Re: Four (4) additional monitor wells, and ammended locations on six (6) wells for Fallon Water-Rights Acquisition Program (PL 101-618), Churchill County, Nevada.

Dear Mr. Seiler:

As provided in Section 534.450 of the Regulation for Water Well and Related Drilling, as adopted under Chapter 534 of the Nevada Administrative Code, and for good cause shown, authorization is herewith granted to complete the subject wells as described in your letter dated May 8, 1992. This office waives only NAC Sections 534.360(3), 534.380(1) and 534.380(8) of the regulation. The annulus of each well must be cemented with cement slurry with no more than 3% bentonite by weight from the approximate depth of the two foot bentonite plug to land surface. Full compliance with the remainder of the statute and regulation is required. The subject wells must be properly plugged and abandoned as required under NAC 534.420 upon project completion or one year from the date of this letter, whichever occurs first. Please include as accurate a description as possible of the location of each well on the completion reports. It is expressly understood this authorization does not relieve the operator of the permitting requirements of other state, federal and local agencies.

If any questions arise please contact this office at 702-687-4380.

Sincerely,

Handwritten signature of Thomas K. Gallagher in black ink.
