 Re: Strat test #2 abandonment
 North Valley prospect
 Washoe County, Nevada

 Mr. Peter Morros
 State Engineer
 Division of Water Resources
 201 South Fall Street
 Carson City, Nevada 89710

Dear Mr. Morros:

Enclosed is a copy of the Well Drillers Report for a 2,001 foot deep temperature observation hole located in Washoe County, Nevada. In December 1984, this drill hole was plugged and abandoned as follows:

12/15 Pulled 120 feet of 2 7/8" tubing. Remaining tubing caught by something in the hole and hoisting plug broke. Dropped remaining tubing into the hole. Fished for the tubing with an overshot for about two hours. Caught tubing several times but was unable to pull it free.

Ran 300 feet of 1" PVC pipe into hole and mixed and pumped 25 sack cement slurry into 300 foot zone (casing shoe). Pushed sack plug to 100 feet with drill pipe. Mixed and pumped 25 sack cement slurry from 100 feet to surface.

12/16 Welded cap on casing end and backfilled with dirt to original surface.

Please contact me if you have any questions.

Sincerely,

 William L. Desormier
 Geologist
