Material	Water Strata	From	To	Thickness
Purpose of Report -				
Destroy 23 Temporary Dewatering Wells -				
All casings extracted, allowing the gravel filter to drop to 6' or more - at least 2' below static water level. Those that did not drop the required depth were dug out with a small bucket backhoe - We pumped the static water level down on each well and filled with 5 sack grout to the existing surface grade.
