

## STATE OF NEVADA

## CERTIFICATE OF APPROPRIATION OF WATER

WHEREAS, Mike Bobrick, Permittee, has presented to the State Engineer of the State of Nevada, Proof of Application of Water to Beneficial Use, from an underground source, through a drilled well, pump and distribution system for irrigation and domestic purposes. The point of diversion of water from the source is as follows:

SW<sup>1</sup>/<sub>4</sub> NW<sup>1</sup>/<sub>4</sub> Section 26, T.13N., R.25E., M.D.B.&M., or at a point from which the NW corner of said Section 26 bears N. 14°56'03" W., a distance of 1,756.71 feet situated in Lyon County, State of Nevada.

Under the provisions of NRS 533.425, the State Engineer has determined the date, source, purpose, amount of appropriation, and the place where such water is appurtenant, as follows:

Name of appropriator:	Mike Bobrick
Source:	Underground
Manner of use:	Irrigation and Domestic
Amount of appropriation:	0.105 c.f.s., but not to exceed 6.312 acre-feet annually
Period of use:	January 1st to December 31st of each year
Date of priority of appropriation:	*January 7, 1955

Description of the works of diversion, manner and place of use:

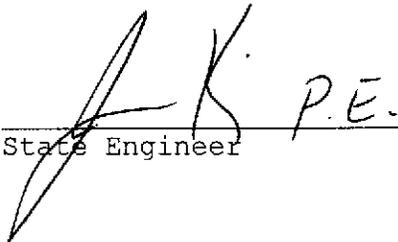

Water is developed by means of a drilled well, 197 feet deep, 6-inch diameter casing, equipped with 5 H.P. Goulds submersible pump and totalizing meter, thence through a distribution system for sprinkler irrigation of 1.578 acres of pasture grass located within a portion of the SW<sup>1</sup>/<sub>4</sub> NW<sup>1</sup>/<sub>4</sub> Section 26, T.13N., R.25E., M.D.B.&M., being further described as within a portion of Assessor's Parcel Number 012-071-35, Lyon County, Nevada.

\*This certificate changes the point of diversion and place of use of a portion of Permit 66887, which changed the point of diversion and place of use of a portion of Permit 15946, Certificate 5473; therefore, the date of priority remains the same as Permit 15946, Certificate 5473.

This certificate is issued subject to the terms of the permit and is issued as a supplemental water supply to lands that have surface water rights from the Walker River as set forth in Claim 45 (Fox Ditch Company, page 25), in "The United States of America, Plaintiff, v. Walker River Irrigation District et al, Defendants, in the United States District Court for the District of Nevada, Case in Equity, C-125", and any storage water provided by the Walker River Irrigation District. The permit holder is responsible for insuring delivery of the decreed and/or storage rights that this permit supplements. In any year that the Federal Water Master declares a full allocation of decreed waters to the priority years of the Walker River claim that this permit supplements, underground water shall not be pumped from the well described under this certificate. In any year that the Federal Water Master has no decreed water, or declares a reduced allocation of Walker River water, and the Walker River Irrigation District has no storage water, or declares a reduced allocation of storage water, then the place of use under this permit can be irrigated with underground water to the extent that Walker River and storage water is not available, but not to exceed four (4.0) acre-feet per acre annually of land irrigated from any and/or all sources.

The right to water hereby determined is limited to the amount which can be beneficially used, not to exceed the amount above specified, and the use is restricted to the place and for the purpose as set forth herein.

IN TESTIMONY WHEREOF, I, JASON KING, P.E., State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 27th day of September, 2011.
