STATE ENGINEER'S OFFICE
2011 DEC 28 AM 10:27
RECEIVED

**BEFORE THE STATE ENGINEER, STATE OF NEVADA
DEPARTMENT OF CONSERVATION AND NATURAL
RESOURCES, DIVISION OF WATER RESOURCES**

IN THE MATTER APPLICATION 81248 FILED BY
SOUTH MEADOWS PROPERTIES LP TO CHANGE
POINT OF DIVERSION AND PLACE OF USE OF
WATERS OF THE TRUCKEE RIVER

**PROTEST AND REQUEST TO
DENY APPLICATION 81248**

COMES NOW, TRUCKEE-CARSON IRRIGATION DISTRICT ("TCID"),
by and through Rusty D. Jardine, Esq., Project Manager, organized under
Chapter 539 of the Nevada Revised Statutes, whose address is Box 1356,
Fallon, Nevada, 89407-1356, with responsibilities under contract, to operate and
maintain the Newlands Federal Reclamation Project and to deliver water to
landowners who have contracted either with the United States or with TCID, and
to comply with water rights decrees for water rights appropriated by the United
States under the Reclamation Act (43 U.S.C. 371, et seq.) and as a party to the
water right decree of the Truckee River, known as the *Orr Ditch Decree (U.S. v.
Orr Water Ditch Co., Equity A-3-LDG, U.S. District Court, Nevada, September 8,
1944)*, and does, hereby, protest the granting of application 81248 (the
"Application"), filed by South Meadows Properties Limited Partnership
("Applicant"), to change the point of diversion and place of use of the Truckee
River waters. NRS 533.370(5) provides, in pertinent part, that "where there is no
un-appropriated waters in the proposed source of supply, or where its proposed
use or change conflicts with existing rights or with protectable interests in existing

domestic wells as set in NRS 533.024, or threatens to prove detrimental to the public interest, the State Engineer shall reject the application and refuse to issue the requested permit.” For the reasons which follow, TCID here protests this Application No. 81248, and does, hereby, request that the application be denied, to wit:

1. Applicant is seeking to change Truckee River decreed rights which have previously been converted to municipal use at full duty. The State Engineer has historically allowed conversion of decreed rights to municipal at full duty knowing that approximately 50% of the right would return to the river as effluent from the Truckee Meadows Water Reclamation facility on an average annual basis, thus protecting return flows and downstream rights. The applicant is seeking to change the point of diversion to an induction well adjacent to the Truckee River in the Tracy segment and distribute water within a place of use which includes portions of Truckee and Carson River watersheds. Applicant also treats their own effluent and has been granted permits 66604, 66604501 and 66604502 to store and use 4,480 afa of effluent for irrigation and commercial purposes within the service area which is not returned to the Truckee River. The proposed use of the rights sought to be changed and subsequent effluent reuse and/or exported water to the Carson River watershed, will not allow effluent return flow to the Truckee River. The application should be limited to the consumptive use fraction of the original decreed right under Orr Ditch Claim DTR 232 and 244.
2. Applications seek to divert surface water using an induction well adjacent to the Truckee River near Tracy which is problematic. Induction wells do not immediately draw surface water as a surface water diversion does, nor do they immediately cease drawing surface water once the well is shut off. Depending on aquifer properties, there would be lag times and diversion from aquifer storage before the river or surface water body is captured. This will create diversion timing issues and potential additional losses from the surface

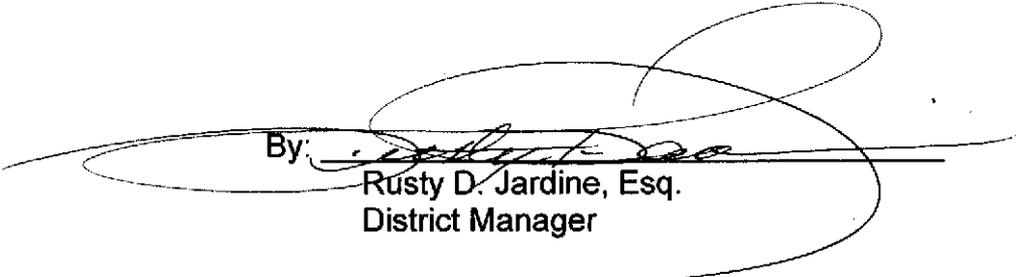

water bodies when the diversions are not in priority to divert. Applicant should be required to construct a well calibrated groundwater model to account and manage surface/groundwater diversions such that they are only occurring when in priority.

Therefore, for the foregoing reasons, the Protestant TCID, here, respectfully requests that the State Engineer issue a ruling subject to the foregoing conditions or deny the application.

Dated this 27th day of Dec., 2011. Respectfully submitted,

DISTRICT

TRUCKEE-CARSON IRRIGATION

By: 
Rusty D. Jardine, Esq.
District Manager
