LETTER OF TRANSMITTAL

CARSON CITY, NEVADA, February 1, 1917.

HON. EMMET D. BOYLE, *Governor of Nevada.*

DEAR SIR: I have the honor to transmit herewith a report of the work and proceedings of the office of State Engineer for the biennial period ending December 31, 1916.

Respectfully yours,

W. M. Kearney

State Engineer.

PERSONNEL OF THE DEPARTMENT OF STATE ENGINEER

W. M. KEARNEY	State Engineer
SEYMOUR CASE	Assistant State Engineer
CASSIUS C. SMITH	Field Engineer
ARCHIE MILLAR	Field Engineer
HARVEY M. PAYNE	Draughtsman and Office Engineer
F. A. GRISWOLD	Chief Clerk and Reporter
PARVIN P. JONES	Clerk
REUBEL SWEETLAND	Typist
SCOTT E. JAMESON	Special Assistant State Engineer
MAURICE P. HAYS, JR.	Special Assistant State Engineer

NOTE—The names of the Water Commissioners are given under the head of "Distribution of Water."

REPORT OF THE STATE ENGINEER

The general policy and conduct of the office of State Engineer has not changed during the past six years. Inasmuch as such policy and the principles which form the basis of the practice of the office have been outlined in the preceding two reports, I deem it unnecessary to repeat them here.

It is my desire to embody in this report only an epitomized statement of the important matters actually placed before the office for disposition during the past two-year period.

Much of the detail work must necessarily be omitted. Reference to the settlement of numerous water disputes through correspondence and informal meetings will be passed over in a general way. Many of these matters were brought up for investigation, whereupon it was found, owing to lack of filings, that no authority existed as a basis for settlement. Immediate action was the only means of affording relief. A delay in preparing papers, etc., meant a loss of crops or a suit at law. Through offers of mediation in such cases, which as a rule were accepted by all parties involved, satisfactory settlements were immediately effected. In some cases, where there was no authority whatever for a diversion of water and the parties either failed to agree or refused a temporary basis of settlement, summary action was taken and the diversion gates closed.

Just before the close of the 1914 biennial period the Supreme Court of the State decided the case of Johannes Anderson, *et al.*, v. Wm. Kearney, as State Engineer, holding that an injunction could not be issued preventing the State Engineer from carrying out the statutory procedure in determining water rights. The effect of the proceeding was declared to be administrative and not judicial.

In order to give the administrative findings a judicial effect, the 1915 Legislature added numerous sections to the 1913 law providing a method of filing the State Engineer's findings with the court for confirmation or modification, and providing a method for hearing in court all persons dissatisfied with the administrative decision.

Shortly after the law became effective Bergman & Allfree and John G. Taylor, Inc., filed a suit in the Federal District Court praying for an injunction to prohibit the State Engineer from continuing with the work outlined by statute.

While the restraining order issued in the case was modified, permitting the work to continue to the point of receiving and hearing contests, the final decision has not, at this writing, been rendered. It is confidently hoped, however, that the matter will be disposed of before the Legislature adjourns.

The fact that the Supreme Court of the United States has rendered an opinion, holding the Oregon law valid in all particulars, serves as a valuable precedent, and warrants me in expressing a feeling of confidence that the Nevada law will be held valid, in that the same issues are involved.

Owing to the restrictions imposed by the restraining orders the progress of the department has naturally been impeded; yet the principal stream

adjudications have advanced to a point where it might be said all the preliminary details have been completed and a point reached where the issues can be joined on contested claims.

On the whole, therefore, I report that satisfactory progress has been made in reaching the real goal intended by the statute, viz: regulation.

HUMBOLDT RIVER ADJUDICATION

As has been stated many times heretofore, the most important duty required by the water statute is the fixing of the extent and priority of water rights that remain undefined.

The Humboldt River system, comprising 328,440 acres (more than one-third of the total irrigated area of the State), is undoubtedly our most important stream to consider. The determination of the relative rights to its waters presents more complicated problems perhaps than any other intrastate stream in the West.

In the following tabulation will be found a list of the water users, and the areas for which water rights are claimed, together with other data which is of importance to the general public:

[a]Resurveyed. [b]Partly resurveyed.

FIELD EXAMINATIONS

The field examinations required in connection with the work of disposing of new applications is becoming more important each year. New questions arise in passing upon protested filings which must be carefully investigated and heard. Even in cases where examinations have been made and reports of stream conditions are on file it becomes necessary to make further and more detailed inspections to properly pass upon the matters that were not involved in prior cases.

The expense involved in making these inspections is considerable and we therefore call attention to the following list.

It will be noted that many of the sources lie in remote parts of the State, and if the records are examined in detail it will be found that the quantities of water involved are small in many instances. Yet the same considerations must be given to these cases as is given to the larger ones

FIELD EXAMINATIONS OF APPLICATIONS FOR WATER RIGHTS MADE DURING YEARS 1915-1916

No.	Applicant	County	Source	Examined by	Date of examination
3096	Ben Pearson	Elko	Emigrant Spring	Seymour Case	Apr. 26, 1916
3391	Alma Tanner	Elko	North and South Forks of Dairy Valley Creeks	Seymour Case	Apr. 25, 1916
3399	Thomas E. Kimber	Elko	South Fork of Dairy Valley Creek	Seymour Case	Apr. 25, 1916
3457	Ben Pearson	Elko	Spring	Seymour Case	Apr. 26, 1916
3910	Richard C. O'Neil	Elko	Springs	Seymour Case	May 1, 1916
3570	James Dahl	Lander	Galena Creek	Seymour Case	July 19, 1916
3571	James Dahl	Lander	Galena Creek	Seymour Case	July 19, 1916
3578	H. C. Christensen	Lander	Galena Creek	Seymour Case	July 19, 1916
3840	H. C. Christensen	Lander	Galena Creek	Seymour Case	July 19, 1916
3919	H. C. Christensen, et. al.	Lander	Tunnel	Seymour Case	July 19, 1916
3119	E. A. Hendrix	Lander	Hole in the Bank Spring	Seymour Case	July 20, 1915
3122	Kate Maddalena	White Pine	Maddalena Springs	Seymour Case	July 14, 1915
3139	Alice Carter	White Pine	Unnamed Spring	Seymour Case	July 20, 1915
3141	Robert Reid	White Pine	Spring	Seymour Case	July 20, 1915
3142	Robert Reid	White Pine	Spring	Seymour Case	July 20, 1915
3148	Theodore Kembessos	White Pine	White Rock Spring	Seymour Case	July 19, 1915
3177	Christian Hermansen	White Pine	Jakes Valley Wash	Seymour Case	July 19, 1915
3186	Washington Rogers	White Pine	Nigger Creek	Seymour Case	July 16, 1915
3201	Mrs. Emma J. Bradley	White Pine	Bostwick Creek	Seymour Case	July 14, 1915
3231	Adams McGill Company	White Pine	Steptoe Slough	Seymour Case	July 15, 1915
3237	J. M. Slopansky	White Pine	Smith Creek	Seymour Case	July 18, 1915
3329	H. G. Pursley	White Pine	Layton Spring	Seymour Case	July 15, 1915
3420	George Doyle	White Pine	Woodman Springs	Seymour Case	July 20, 1915
3421	Frank L. Sellstrom	White Pine	Weaver Creek	Seymour Case	July 18, 1915
3433	Andy Deitlaf	White Pine	Seigel Creek	Seymour Case	June 30, 1916
3467	Wilford Morely	White Pine	Horsely Spring	Seymour Case	July 18, 1915
3792	John F. Molleson	White Pine	Molleson Springs	Seymour Case	July 3, 1916
4018	R. A. Millick	White Pine	Piermont Creek	Seymour Case	June 30, 1916
3791	Ella Adams	Elko	Smith Creek	M. P. Hayes	July 14, 1916
3090	Rochester Consolidated Mining and Milling Co.	Humboldt	North Spring Gulch	S. E. Jameson	Nov. --, 1916
3250	Sidney Brown, et. al.	Humboldt	Sacramento Canyon	S. E. Jameson	Nov. 13, 1916
3981	Thomas E. Bangs	Humboldt	Underground waters	S. E. Jameson	Nov. 13, 1916
4047	Rochester Mines Company	Humboldt	Spring	S. E. Jameson	Nov. 14, 1916
4130	Hubert C. Charles	Humboldt	Spanish Gulch Springs	S. E. Jameson	Nov. 5, 1916
4146	A. L. Dornberger	Humboldt	Altoona Spring	S. E. Jameson	Nov. 6, 1916
4150	A. L. Dornberger	Humboldt	Antelope Springs	S. E. Jameson	Nov. 6, 1916
3544	James B. and Tweed A. Wilson	Clark	Mesquite Spring	W. M. Kearney	Oct. 22, 1915
3545	James B. and Tweed A. Wilson	Clark	McClanahan Spring	W. M. Kearney	Oct. 22, 1915
2835	C. E. Shillingford and Wm. W. Coleman	Douglas	West Walker River	W. M. Kearney	May 5, 1916
3173	Robert A. Trimmer	Douglas	Long pond	W. M. Kearney	June 11, 1915
3707	Eugene Scossa	Douglas	Job's Canyon	W. M. Kearney	Sept. 6, 1916
3717	F. W. Sarman	Douglas	Carson River	W. M. Kearney	Nov. 9, 1916
3818	L. M. Jacobsen	Douglas	Pine Nut Creek	W. M. Kearney	Sept. 29, 1916
3826	Fritz Elges	Douglas	Pine Nut Creek	W. M. Kearney	Sept. 29, 1916
3945	Henry F. Beste	Douglas	Pine Nut Creek	W. M. Kearney	Sept. 29, 1916
3946	George G. Hussman	Douglas	Pine Nut Creek	W. M. Kearney	Sept. 29, 1916

FIELD EXAMINATIONS—*Continued*

OFFICE FINANCES

The amounts shown in the following table are based upon the quantities of water applied for in the original applications.

Many of the filings will undoubtedly be withdrawn; some will be canceled for failure to pay the required fees and others will be finally approved for less amounts of water than applied for. Thus the tabulation represents only the maximum amounts that may be collected by the office for which we should be credited.

TABLE OF FEES REQUIRED TO BE COLLECTED FOR ISSUANCE OF PERMITS ON UNAPPROVED APPLICATIONS FILED FROM MARCH 22, 1913, TO DECEMBER 31, 1916. (Based on Approval for Amounts Shown in Applications.)

No.	Fee	No.	Fee	No.	Fee	No.	Fee	No.	Fee	No.	Fee

00491	9—W. J. Smiley	Reed Creek	157.59[a]	20.75
00607	11—Robert W. Anderson	Mary's River and "T" Creek	1,190.00[a]	114.50
00604	11—W. B. Gibbs (successor to the Truett Land and Livestock Company)	Wildcat Creek	525.60[a]	57.56

[a]Areas taken from proofs of appropriation. *Resurvey not yet completed.

Elsewhere in this report we have embodied a statement showing the receipts and expenditures of the office for the biennial period just closed. In addition to said receipts, the following may be added as assets. The cost of surveying has been charged against the appropriation, thus while these matters have not been closed the items represent uncollected fees due.

FEES PAID AND TO BE PAID BY THE WATER USERS FOR CULTURAL SURVEYS AND MAPS THAT HAVE BEEN MADE AT THE EXPENSE OF THE STATE TO ACCOMPANY PROOFS OF APPROPRIATION OF WATER FROM THE HUMBOLDT RIVER SYSTEM

[a]Areas taken from proofs of appropriation

OFFICE FINANCES

A careful examination of the statement following will show that the general appropriation for the support of the office for the years 1915 and 1916 amounted to $29,000. Of this sum $2,057.88 was returned to the treasury as an unexpended balance, making the actual expenditure from said appropriation $26,942.12.

The total fees collected amounted to $32,234.61, including the sum of $1,889 held from 1914. Of this sum $17,452.45 was deposited with the State Treasurer. Thus, the actual cost to the general treasury for the support of the office, aside from the salary of the State Engineer and Assistant State Engineer, was $9,489.67 for the two-year period.

There remains on special deposit the additional sum of $3,952.16, held for recording certificates and for publications now under way.

APPLICATIONS TO APPROPRIATE WATER

Prior to the period covered by this report—that is, prior to January 1, 1915—3,226 applications to appropriate water had been filed in the office of the State Engineer. During the years 1915 and 1916, 238 of those applications have been approved, 64 denied, 67 applications and permits have been canceled, and 40 withdrawn by the applicants. Of the first 3,226 applications, 83 are awaiting action, 28 of which are for waters of the Humboldt River and its tributaries, for which stream system the determination of surplus water has not as yet been completed. Most of the remaining 55 applications are awaiting the outcome of pending permits on the various water sources, and for the disposal of protests.

Of the 1,043 applications filed during the years 1915 and 1916, 655 were acted upon, 526 being approved, 31 denied, 66 canceled and 35 withdrawn. This left unacted upon in the office, of the applications filed in 1915 and 1916, 388, of which 95 are in course of publication or still open for protest and 86 are protested, with protests pending.

During the period there have been filed 165 protests against the granting of applications, 745 affidavits of commencement and of completion of work and 140 proofs of application of water to beneficial use were filed and acknowledged, and 660 cultural maps in connection with permits to appropriate water and proofs of appropriation of water were filed, checked and acknowledged.

APPLICATIONS FILED DURING YEARS 1915 AND 1916

Total		509

MAILING LIST AND CORRESPONDENCE

During the period 1915–1916 there have been forwarded from this office 16,250 letters and 2,465 pieces of second-class mail, such as pamphlets, reports, blank forms, etc.

Of the 16,250 pieces of first-class mail 1,570 were registered in accordance with the statutory requirements.

The first-class mail consisted largely of answers to inquiries concerning water rights, decisions of the State Engineer, notices of the dates when filings were due, etc. A very large number of the letters require considerable detail research work before a reply can be made. The work involved in keeping up the current correspondence increases each year as the number of new filings for water increases. It also becomes more intricate and requires greater care in disposing of the same.

It has been the desire of the office to make an immediate reply to each and every inquiry even in cases where it might not have been the duty of the office to do so; yet we feel that some beneficial results have accrued to the state thereby.

APPLICATIONS TO APPROPRIATE WATER FILED IN THE OFFICE OF THE STATE ENGINEER DURING THE YEARS 1915 AND 1916

2582	Feb. 1, 1913	Jennie C. Dunphy-Meyer, Trustee, et al.	Greater Humboldt Corporation	Rock Creek	App. denied
2590	Feb. 7, 1913	S. T. and S. C. Weeks	W. B. Gibbs	Steele Creek	Pending
2702	May 16, 1913	Mrs. M. H. Green	D. R. Corbett	Kitridge Creek	Pending
2702	June 5, 1913	Elko Water and Light Corporation	D. R. Corbett	Kitridge Creek	Pending
2711	June 16, 1913	Jennie C. Dunphy-Meyer, Trustee, et al.	George Arthur, et al.	Lynn Creek	Overruled
2752	Sept. 5, 1913	Clark D. Reed	Parley Black	Meadow Valley Creek	App. denied
2778	Nov. 15, 1913	Jennie C. Dunphy-Meyer, Trustee, et al.	E. E. Beachler	Jack Creek	App. wdn
2784	Oct. 17, 1913	Thomas R. and W. V. Odgers	Garfield Bartmus	Mud Springs	Overruled
2809	Jan. 15, 1914	William T. O'Neil, et al.	R. A. Millick	Piermont Creek	App. denied
2853	Apr. 21, 1914	Jennie C. Dunphy-Meyer, et al., Trustee	Wm. C. Owens	Spring and overflow of Simonds Cr.	Overruled
2880	Apr. 2, 1914	Crown Columbia Paper Company	R. M. Preston and D. H. Updike	Bronco Creek	App. wdn
2880	Apr. 7, 1914	National Ice and Cold Storage Company	R. M. Preston and D. H. Updike	Bronco Creek	App. wdn
2881	Apr. 2, 1914	Crown Columbia Paper Company	R. M. Preston and D. H. Updike	Hoey or Joe Gray Creek	App. wdn
2881	Apr. 7, 1914	National Ice and Cold Storage Company	R. M. Preston and D. H. Updike	Hoey or Joe Gray Creek	App. wdn
2884	Apr. 7, 1914	National Ice and Cold Storage Company	Reno Power, Light and Water Company	Bronco Creek	App. wdn
2884	Apr. 27, 1914	Crown Columbia Paper Company	Reno Power, Light and Water Company	Bronco Creek	App. wdn
2885	May 22, 1914	J. H. Cox	Dolbear Mining Company	Antelope Springs	App. denied
2888	June 27, 1914	Douglas Milling and Power Company	H. F. Dangberg Land and Livestock Co.	East Carson River	Pending
2889	Apr. 14, 1914	Wm. Stock, et al.	Greater Humboldt Corporation	Martin Creek	App. denied
2900	Apr. 14, 1914	J. R. Harvey	Greater Humboldt Corporation	Martin Creek	App. denied
2919	May 28, 1914	John Gregerich, et al.	Ermina G. Dickinson	Red Rock or Dry Creek	App. wdn
2925	Apr. 11, 1914	Peter Organ	G. Gallio	Star Canyon Creek	Overruled
2979	July 16, 1914	Estate of George F. Parker	George D. Maddalenia	Parker Spring	Overruled
2985	Aug. 19, 1914	George B. Williams	Samuel Baker	Sam's Creek	Overruled
2988	Sept. 21, 1914	71 Ranch Company	Andrew P. Guldager	Sinks	Overruled
2989	Oct. 13, 1914	John Laxague	Floyd K. Grimes	Reynolds Creek	Overruled
3006	July 10, 1914	Z. Silva	Albert H. Johnson	Springs	Pending
3011	July 10, 1914	Z. Silva	Albert H. Johnson	Springs	Pending
3023	Aug. 18, 1914	John G. Taylor	Byron T. Morse	Clear Creek	App. wdn
3033	Nov. 16, 1914	Gerlach Livestock Company	C. W. Fisk	Bog Hole	App. denied
3034	Aug. 14, 1914	Mrs. M. H. Green	Elko Water and Light Corporation	Kitridge Creek	Pending

APPLICATIONS PROTESTED PRIOR TO JANUARY 1, 1915, ACTED UPON DURING 1915–1916—*Continued*

No.	Date	Name of protestant	Name of applicant	Source	Action
3035	Oct. 30, 1914	Jennie C. Dunphy-Meyer, trustee	Knud Nelson	Boulder Creek	Overruled
3062	Oct. 8, 1914	Albert A. Stock	Pacific Livestock Company	Happy Creek	Overruled
3063	Oct. 8, 1914	Albert A. Stock	Pacific Livestock Company	Happy Creek	Overruled
3064	Oct. 8, 1914	Albert A. Stock	Pacific Livestock Company	Happy Creek	Overruled
3067	Oct. 13, 1914	B. Ashton	Gold Hill-Nevada Gold Mining Company	Spring Well	App. denied
3090	Nov. 12, 1914	S. M. McClaren and F. O. Palmer	Rochester Con. Mining and Milling Co.	North Spring Gulch	Pending
3094	Oct. 13, 1914	Thomas P. Clark	Charles Gupton	Carico Spring	Overruled
3100	Oct. 15, 1914	Henry Anderson	Minnie L. Heinz	Wet Ravine	Pending
3102	Nov. 16, 1914	Gerlach Livestock Company	C. W. Fisk	Bog Holes	App. denied
3111	Oct. 26, 1914	Garat and Company	Charles C. Winters	Wall Creek	Overruled
3114	Nov. 25, 1914	G. D. and R. O. Bliss	H. H. Sheldon	Bliss Canyon and Spring	Overruled
3118	Nov. 18, 1914	Giacomo Pietrini	M. C. Klosky	Telegraph Creek	Sustained
3119	Nov. 25, 1914	Adams-McGill Company	E. A. Hendrix	Spring	Overruled
3133	Dec. 16, 1914	Louisa Sadler	Ferdinand T. Schnackenberg	Huntington Creek	Pending
3139	Nov. 25, 1914	Adams-McGill Company	Alice Carter	Springs	Pending
3141	Nov. 25, 1914	Adams-McGill Company	Robert Reid	Spring	Pending
3141	Nov. 28, 1914	H. A. Comins	Robert Reid	Spring	Pending
3142	Nov. 25, 1914	Adams-McGill Company	Robert Reid	Spring	Pending
3146	Dec. 12, 1914	Land Development Company	Charles H. Fox	Boulder Creek	Overruled
3147	Dec. 12, 1914	Land Development Company	Almond C. Fox	Boulder Creek	Overruled
3148	Nov. 25, 1914	Adams-McGill Company	Theodore Kembessos	White Rock Spring	Overruled
3149	Dec. 12, 1914	Glenbrook Improvement Company	J. P. Donnelly and P. M. Newgard	North's Canyon Creek	App. wdn
3173	Dec. 19, 1914	A. L. Dressler	R. A. Trimmer	Long Pond	Pending

NOTE—The above tabulation is a complete list of the protests which were pending on January 1, 1915. The numbers marked "Pending" in the tabulation, with but two or three exceptions, denote applications which have been investigated or upon which hearings have been completed, but held for further information.

PROOFS OF APPROPRIATION OF WATER FILED DURING THE YEARS 1915–1916

Exclusive of Humboldt River System

No.	Name	Source of appropriation	Certificate No. Book 2	Amount	Purpose, including domestic
01348	George A. Bain	Spring Creek, branch of China Creek		161.52 acres	Irrigation

[b]No statement of proof. Map only on file.

[c]Proof returned for amendments.

COMPILATION OF CLAIMS

Compilations of the claims in and to the waters of the following stream systems have been made by the State Engineer and a copy of the compilation forwarded to each claimant. Under each stream system the names of water users included in the compilation are given, together with the areas of irrigated land claimed by each.

These tabulations do not include the compilations of claims on the following sources:

Muddy River, involving 2,870.9 acres.
Carson River, involving 31,020 acres.
White River, involving 4,051.1 acres.
Walker River, involving 62,007.55 acres.

Humboldt River and Tributaries

Date of compilation of claims, March 1, 1916.

Total area of land involved in this compilation is 328,440 acres. For individual claims included in the compilation, reference is made to the table on pages 7 to 20, inclusive.

Little Humboldt River and Tributaries

Date of compilation of claims, April 1, 1913.

Total area of land involved in this compilation is 50,535 acres. For individual claims included in the compilation, reference is made to pamphlet issued by the State Engineer entitled "Compilation of Claims on the Little Humboldt River and Tributaries."

Barber Creek and Tributaries[a]

Date of compilation of claims, April 27, 1915.

Spanish or Perry Aiken Creek and Tributaries[a]

Date of compilation of claims, June 4, 1915.

Goose Creek and Tributaries[a]

Date of compilation of claims, April 8, 1916.

Salmon River and Tributaries[a]

Date of compilation of claims, April 15, 1916.

Weeks or Steele Creek and Tributaries

Date of compilation of claims, February 4, 1916.

Serial No.	Name of appropriator	Main stream or tributary	Irrigated acreage claimed
01384	W. B. Gibbs	Steele and Weeks Crks. and branches.	963.00
01384	W. B. Gibbs	Williams Creek and branches	147.00
01385	Leach Brothers, Inc.	Braase Creek	102.25
01387	William Schodde	Weeks or Steele Creek	15.60
01388	Steele Brothers	Steele Creek and branches	1,039.02
01388	Steele Brothers	Steele, Braase and Williams Creeks	640.00
01389	John C. Wood	Steele Creek	600.00
01389	John C. Wood	Noble Creek	260.00
01390	Weeks Brothers	Steele Creek and branches	1,332.49
01390	Weeks Brothers	Williams Creek and branches	436.69
01390	Weeks Brothers	Braase Creek	471.96
	Total		6,008.01

[a]For amount and segregation of claims see under "Orders of Determination" following.

Evans Creek and Its Tributaries, Being Hufford or Jake's Creek and Warm Springs

Date of compilation of claims, April 1, 1916.

01342	Clover Valley Land and Stock Company	Warm Springs	3,534.70
01343	Clover Valley Land and Stock Company	Hufford or Jake's Creek	1,415.85
01357	Hammond Brothers	Hufford or Jake's Creek	106.76
01358	John G. Taylor	Hufford or Jake's Creek	126.41
01366	Clover Valley Land and Stock Company	Evans Creek	995.40
01366	Clover Valley Land and Stock Company	Evans Creek (below confluence with Jakes Creek)	640.37
	Total		6,819.49

ORDERS OF DETERMINATION

Orders of determination of the relative rights in and to the waters of the following stream systems have been made by the State Engineer, and each has been filed with the Clerk of the District Court having jurisdiction, as provided in Section 34, Chapter 140, Statutes of 1913, as amended by Chapter 253, Statutes of 1915. Under each stream system the names of water users included in the determination are given, together with areas of land and acre-feet of water allowed:

Barber Creek and Tributaries

Date of order of determination, November 4, 1915.

Filing No.	Name of appropriator	Main stream or tributary	Allowed in finding	
			Acres	Acre-feet per season
01349	Eugene Scossa	Barber Creek	33.04	181.17
01350	Estate of Lyman Barber	Barber Creek	202.89	1,102.81
	Total		235.93	1,283.98

Spanish or Perry Aiken Creek and Tributaries

Date of order of determination, November 27, 1915.

01344	Adam Patterson	Spanish or Perry Aiken Creek	1,431.20	5,252.00

Salmon River and Tributaries

Date of order of determination, October 4, 1916.

01401	William H. Gilmer	Camp Creek	149.80	534.00
01410	W. P. Helsley	Wilson Creek	274.86	927.00
01410	W. P. Helsley	Willow and Lime Creeks	44.91	149.00
01411	O'Neil Bros. Land and L. S. Co.	Salmon River	378.77	1,210.00
01411	O'Neil Bros. Land and L. S. Co.	Canyon Creek	444.44	1,478.00
01411	O'Neil Bros. Land and L. S. Co.	Pole Creek	52.45	175.00

	Total		995.97	3,826.00

DISTRIBUTION OF WATER

For the irrigation seasons of 1915 and 1916 the following men have acted as Water Commissioners:

Source	*1915*	*Commissioners*	*Appointed*
West Walker River		J. W. Pierce	Aug. 21, 1915
East Walker River		R. T. Berryman	Aug. 28, 1915
Main Walker River		J. M. Houston	Aug. 17, 1915
Muddy River		Leonard Tanner	*June 9, 1913
Currant Creek		Geo. T. Saxton	July 2, 1915
Duckwater Creek		Geo. T. Saxton	July 2, 1915
East Carson River		O. L. Hussman	July 29, 1915
West Carson River		A. A. Schole	July 19, 1915
Carson River (Lyon County)		F. B. Stewart	Aug. 19, 1915
Carson River (Ormsby County)		Geo. B. Gates	Aug. 9, 1915
Humboldt River (Lovelock Valley)		L. H. Taylor	Apr. 21, 1915
	1916		
West Walker River		J. W. Pierce	Aug. 15, 1916
East Walker River		E. H. Sweetland	Aug. 22, 1916
Main Walker River		Wm. W. Coleman	Aug. 5, 1916
Fox Ditch from Walker River		C. D. Bovard	Aug. 5, 1916
Muddy River		Leonard Tanner	*June 9, 1913
Duckwater Creek		Geo. T. Saxton	Apr. 1, 1916
East Carson River		O. L. Hussman	Aug. 1, 1916
West Carson River		A. A. Schole	July 18, 1916
Carson River (Lyon County)		Ruel Lothrop	Aug. 8, 1916
Blasengame Creek		Jas. Goldsworthy	June 20, 1916
Carson River (Ormsby County)		C. A. Ambrose	Aug. 9, 1916
Humboldt River (Lovelock Valley)		S. E. Jameson	June 15, 1916
Smith Creek		M. P. Hayes	June 15, 1916

*Service has been continuous since date of appointment.

DUCKWATER CREEK

The District Court of the Fifth Judicial District of the State of Nevada, in and for the County of Nye, determined certain water rights on Duckwater Creek in the year 1909. The decision of the court was rendered in a case primarily resultant from the granting of a permit by former State Engineer Frank R. Nicholas to Mr. J. C. Tognoni to utilize certain waters of Big Warm Spring near Duckwater, Nevada.

The decree of the court provided that Mr. J. C. Tognoni was entitled to utilize under and by virtue of the permit only such of the waters of Big Warm Spring as could be developed or saved by installing works

of control so as to prevent the filling of a small lake situated on a plateau near the spring, thus eliminating the loss in evaporation from the lake surface and the losses due to seepage, etc. One of the provisions of the decree required that the normal flow of Duckwater Creek, which was found to have its source in the Big Warm Spring, should be maintained at a point known as the Stone Mill. Owing to the lack of measurements necessary to establish the normal flow of Duckwater Creek at the point designated before the normal conditions had been changed by diverting the waters of Big Warm Spring from the lake, more or less difficulty resulted over the use of the waters after the suit was decided. It will be noted that the decree was rendered in the year 1909, and owing to the fact that it was recommended that local or resident Water Commissioners be appointed to distribute the waters of Duckwater Creek, no scientific measurements of the flow were taken. Such men as were appointed were not qualified as hydraulic engineers.

Three years ago a tentative normal flow was agreed upon and an engineer was appointed as Water Commissioner to distribute the water and to attempt to obtain figures indicating the normal flow at the point designated by the court. During the period Mr. Tognoni continued to divert the waters from the lake which had already been demonstrated to be the source from which Duckwater Creek was fed by means of underground channels. The results of one season's measurements showed such a variable flow, due to the drying up and refilling of the lake, that they were not acceptable to this office. We recommended, therefore, to the court and to the water users that the use of water by Mr. Tognoni be discontinued for a year at least, and that the normal conditions of the stream and lake should be reestablished to enable this office to obtain accurate measurements and definitely establish a normal-flow record.

In accordance with this recommendation, Mr. Tognoni agreed to discontinue the use of water and to permit the reestablishment of normal conditions for a period of one year. This office therefore installed automatic gages and cooperated with the water users by paying a portion of the salary of the Water Commissioner, and also secured the cooperation of the United States Geological Survey in taking and recording measurements for establishing the normal flow of the creek. We now have a basis for a final settlement of the long-standing dispute over the waters of the sources involved.

We have obtained, as a result of the arrangement and measurements, figures indicating the flow of the various springs and of Duckwater Creek for each day covering a period of approximately one year, which I believe gives a fairly accurate basis for determining and settling for all time the disputed questions.

Negotiations are under way for a conference with the water users to allow them an opportunity to present any objections to the measurements before the matter is submitted to the court for final decree.

Measurements of Duckwater Creek

The following tables show the normal flow of Duckwater Creek for the periods indicated, as taken by Geo. T. Saxton, Observer:

Normal Flow of Duckwater Creek for the Year 1916

BUREAU OF INDUSTRY, AGRICULTURE AND IRRIGATION

By an Act approved March 18, 1915, it was provided that on and after April 1, 1915, the State Engineer should receive all mail addressed to the Bureau of Industry, Agriculture and Irrigation, and should mail such of the bulletins theretofore issued by that bureau as were requested. Provision is made in the Act that the State Engineer, with the approval of the Board of Examiners, reprint such of the bulletins as become exhausted.

It is also provided in the Act that the furniture, office equipment, and other property of the Bureau of Industry, Agriculture and Irrigation should be sold, and the proceeds used exclusively in payment for postage, stationery and wrappers used in distributing the publications of the bureau.

In the following tabulation is shown the receipts from the sale of equipment and property as above provided, and the disbursements of the funds so received:

Receipts

July 28, 1915—From sale of furniture	$286.00	
Jan. 24, 1916—From sale of automobile	250.00	
		$536.00

Disbursements

May 31, 1915—Wells, Fargo & Co.	$1.19	
Nov. 3, 1915—Stamps for mailing literature	75.00	
Oct. 9, 1916—Stamps for mailing literature	50.00	
Oct. 31, 1916—W. W. Ellis, for services	23.35	
Nov. 30, 1916—W. W. Ellis, for services	16.65	
		166.19
Unexpended balance		$369.81

During the period from April 1, 1915, to December 31, 1916, approximately 2,000 of the bulletins and reports that were published by the Bureau of Industry, Agriculture and Irrigation have been mailed from this office. Excepting a few lots of several hundred each, the publications were mailed separately, or in series of from three to five, to individuals in almost every section of the country. Supplies of several of the bulletins have been exhausted for some time and urgent requests have been made for reprints at the earliest possible date.

During the period above stated approximately 1,500 letters have been written in reply to requests for specific information relative to some particular locality, industry, or opportunity in the State.

APPLICATIONS FOR LAND UNDER THE CAREY ACT

The following applications for temporary withdrawals under the Carey Act were filed during the years 1915 and 1916:

State List No.	*Name*	*Acreage*
075	Bessie Miller	62,883.97
076	Donald C. Wheeler	7,441.20
077	Railroad Valley Land and Water Co.	2,521.56
078	Eugene T. Merritt	90,413.72
079	Oasis Land Company	2,000.00
080	Joseph D. Hill	2,986.66

The lands applied for by Bessie Miller under application No. 075 are situated in Townships 1 and 2 south, Range 34 east, Townships 1, 2, and 3 south, Range 35 east, and Townships 1 and 2 south, Range 36 east, M. D. B. & M., in Esmeralda County.

The proposed water supply is from Fish Lake and its tributaries and all the unappropriated waters, both surface and subterranean, in Fish Lake Valley. The report by the State Engineer, as to the water supply and as to the project in general, was unfavorable.

The application was withdrawn.

The lands applied for by Donald C. Wheeler under application No. 076 are situated in Townships 37 and 38 north, Range 25 east, M. D. B. & M., in Humboldt County.

The proposed water supply is from Summit Lake, High Rock Creek, and Little High Rock Creek. As no definite records of flow of the sources named were available, it was recommended that the applicant be allowed a temporary withdrawal of the lands to enable him to make the necessary measurements of water, and to be protected in the meantime.

The application is pending.

The lands applied for by the Railroad Valley Land and Water Com-

pany under application No. 077 are situated in Township 10 north, Range 57 east, M. D. B. & M., in Nye County.

The proposed water supply is from subsurface waters underlying said land. It was recommended that a temporary withdrawal be allowed to enable the applicant to make determinations relative to the water supply.

A temporary withdrawal was allowed.

The lands applied for by Eugene T. Merritt under application No. 078 are situated in Townships 33 and 34 north, Range 62 east, Townships 33, 34, and 35 north, Range 63 east, Townships 33, 34, 35, and 36 north, Range 64 east, and Township 36 north, Range 65 east, M. D. B. & M., in Elko County.

The proposed water supply is from a subsurface watercourse or lake. It was recommended that the lands be temporarily withdrawn to permit the applicant to make demonstrations as provided by the Congressional Act of 1910, whereby lands are permitted to be withdrawn for a period of a year pending determinations as to the water supply and the possibility of ultimate reclamation and cultivation.

The application was withdrawn.

The lands applied for by the Oasis Land Company under application No. 079 are situated in Township 21 south, Range 54 east, M. D. B. & M., in Nye County.

The proposed water supply is from "underground waters of Pahrump Valley." It was recommended that a temporary withdrawal of the lands be allowed, thus giving the applicant an opportunity to demonstrate whether or not there is water in sufficient quantities underlying the land to reclaim it.

A temporary withdrawal was allowed.

The lands applied for by Joseph D. Hill under application No. 080 are situated in Township 21 south, Range 54 east, M. D. B. & M., in Nye County.

The proposed water supply is from "Pahrump Valley Creek, the source of which is a group of large springs in Pahrump Valley, Nye County, Nevada." It was recommended that a temporary withdrawal be allowed to enable the applicant to make the necessary surveys and determinations of the cost of developing the proposed project.

A temporary withdrawal was allowed.

COOPERATIVE STREAM MEASUREMENT AND IRRIGATION INVESTIGATION WORK WITH THE UNITED STATES

Water Resources

During the early years of the activities of the United States Geological Survey and United States Reclamation Service in Nevada, cooperative agreements were in effect whereby stream measurement work was carried on by the United States Geological Survey jointly with the State, upon a basis that required each party to pay one-half the cost thereof.

For several years prior to the year 1913 there were no working agreements, owing to the fact that our Legislature failed to make the necessary appropriation to meet the amount set aside by the Government. However, in the year 1913, the Legislature made an appropriation of $5,000 for the biennial period to reestablish the agreements and to resume the work.

A complete report of the results and of the progress of the work of obtaining stream-flow data was prepared and submitted jointly with the State Engineer's report covering the period 1913–1915. The report consisted of several hundred pages of tabulated figures containing accurate data concerning the run-off from numerous important streams from various parts of the State, but unfortunately it was not printed, and it is not available for distribution to the general public.

Inasmuch as the original data obtained during the past two years, together with that of former years, is on file in this office and available for reference by interested parties, I have concluded to omit in this report a complete tabulation of results as was embodied in the 1913–1915 report, and to make only a general statement regarding the progress of the work during the last biennial period.

Aside from the stations maintained by Water Commissioners acting directly in connection with the State Engineer's office, we have maintained under the cooperative agreement an average of thirty-four (34) stations as follows:

Humboldt River at Lovelock.
Humboldt River at Oreana.
Humboldt River at Golconda.
Humboldt River at Palisade.
South Fork of the Humboldt River near Elko.
North Fork of the Humboldt River at Devil's Gate.
Lamoille Creek near Halleck.
Lamoille Creek near Lamoille.
Maggie Creek at Carlin.
Mary's River at Marlo Vista.
Mary's River at Mary's River Cabin near Deeth.
Starr Creek near Deeth.
One Thousand Springs Creek near Tecoma.
Rock Creek at Jenkins's Ranch near Battle Mountain.
Bruneau River near Gold Creek.
South Fork of Owyhee River near Tuscarora.
Jack Creek at Woodford's Ranch near Tuscarora.
Snow Creek near Tuscarora (Saval's Ranch).
Reese River at Bell's Ranch near Ione.
Big Creek near Austin.
Birch Creek near Austin.
Walker River at Schurz.
East Walker River at Mason.
West Walker River at Hudson.
West Walker River at Coleville, Cal.
Galena Creek near Washoe.
Cleveland Creek near Adams-McGill Ranch, Cleveland.
Snake Creek near Baker.
Baker Creek near Baker.
White River near Preston.
Currant Creek at Currant.
Big Warm Spring at Duckwater.
Duckwater Creek at Duckwater.
Muddy River near Saint Thomas.
Muddy River near Moapa.

In addition to the above there have been numerous miscellaneous stream measurements made and recorded on various streams throughout the State; also records are available on the Salmon River system and Goose Creek, obtained under a joint agreement existing between the United States Geological Survey and the Vineyard Land and Stock Company.

During the period 1915–1916, the United States Geological Survey has made proper certificates and submitted proper accounts concerning the expenditures of the cooperative funds. I might add that we have equipped several stations with automatic recording gages, thus insuring the accuracy of the gage heights at all times, and producing continuous gage-height records. Interested parties have in certain instances contributed funds for the purchase of the automatic recording gages, thus aiding very materially in the work.

Owing to the limited appropriation, only the more important streams can be studied. However, it is the desire of this office to continue the work of measuring the available water supplies on each stream for a sufficient period of time to indicate what can be reasonably expected for irrigation or other purposes, after which new streams will be selected and studied.

During the ensuing period it is the intention of this office to discontinue certain stations, upon which we have now obtained from two to four years' records, and substitute others that are becoming more important.

During the period from March, 1913, to March, 1916, the work was in charge of Mr. E. A. Porter, District Engineer of the United States Geological Survey, with headquarters at the division office, Salt Lake City, Utah. Since March, 1916, Mr. C. C. Jacob has been in charge as District Engineer, succeeding Mr. E. A. Porter, who resigned on the above date. It is planned at the present time to install a branch office in Nevada in charge of an assistant engineer, so as to have duplicate records of all work and data immediately available.

The cooperative agreement is entirely satisfactory, and it is my recommendation that an appropriation be made to continue the work.

Irrigation Investigation

The Legislature of 1915 appropriated the sum of $4,000, to be available upon the condition that the United States would appropriate a like sum to be used for the purpose of measuring the amount of water used for irrigating different crops and the amount used upon the different kinds of soil throughout the State.

The United States Department of Agriculture made the necessary certification that the government allotment was available, and work was commenced early in the spring of 1915 in Lamoille Valley, Elko County, Nevada. Prior to the year 1915, a study of the duty of water was carried on for a period of approximately three years in the Lovelock Valley for the purpose of obtaining data to show the actual needs as well as the actual use of water on the character of soil predominating in that section. Such data is essential in the making of the determination of the rights of the various water users in cases where it is shown that the water users making proof or those holding water rights do not possess evidence of the amount of water actually required for the uses for which the appropriations were made.

The different districts along the river have different soils and employ different methods of irrigation, and grow different crops. It is necessary, therefore, to select representative districts and ascertain the requirements by accurate measurements covering a period of time sufficient to demonstrate closely the water requirements for the different crops, the different soils, and the different methods of applying the water to the land.

With this end in view, the Lamoille district and certain portions of the South Fork of the Humboldt River and Starr Valley, all in Elko County, Nevada, were selected as representative of certain classes of either soil, crops or method of applying water to the land.

In the Lamoille district measurements have been taken covering two irrigation seasons, to wit: 1915–1916.

In 1915 the work was in charge of Mr. C. G. Haskell, Irrigation Engineer of the United States Department of Agriculture, in accordance with the cooperative agreement which provides that the work is to be carried on under the supervision of a representative of the United States. The work was begun and weirs installed under the direction of Mr. J. G. Scrugham, in charge of the Department of Engineering Experimentation at the University of Nevada. During the season of 1916 the work has been in charge of Mr. F. L. Bixby, Irrigation Engineer representing the United States Department of Agriculture.

The report of the work of 1915 was filed in December, 1915, and the record of the same is available in this office. Owing to the character of the tabulations, etc., I have deemed it unnecessary to embody the same herein, as the results thereof are similar to the results prepared for publication in the last biennial report, and both are available for immediate reference. The result of the 1916 work has not yet been reported. In view of the fact that the measurements for the two seasons do not give a representative average, owing to seasonal conditions, measurements covering a third irrigation season will be required, which I believe will be sufficient to demonstrate a fair average of the duty of water in the districts involved.

It is very essential to the development of the State that the accurate duty of water be established, for if by actual demonstration it can be shown that the same results can be obtained in the way of crop production by applying three acre-feet of water where four or more acre-feet are used, it is evident that the result is a development of the natural flow of the stream. In other words, the excess use of water which produces no beneficial results is an avoidable waste, the prevention of which can be brought about by actual demonstration under the observation of the interested farmers.

As a result of a natural development along these lines in the way of scientific farming, it is noted that the irrigated area in the various districts is increasing each year. I recommend, therefore, that the appropriation be continued until such time as sufficient data is available to represent the duty of water on representative classes of land for representative classes of crops and for representative methods of irrigation.

In the list below are given the total acreages of land claimed under vested water rights in all the proofs of appropriation of water filed in

the State Engineer's office. The main sources of water supply and lands irrigated therefrom are listed separately. Under "Miscellaneous" are grouped the acreages claimed in proof of appropriation of water from small streams and springs in every part of the State:

Source	*Acres*
Humboldt River and tributaries (compiled)	328,440
Carson River and tributaries, exclusive of land below the Lahontan Reservoir (adjudicated)	31,020
Walker River and tributaries (from findings of Henry Thurtell, Master in Chancery)	62,000
Little Humboldt River and tributaries (compiled)	50,535
Truckee River (Truckee Meadows or Reno Valley, approximate)	17,500
Muddy River and tributaries (adjudicated)	2,870
Salmon River and tributaries (compiled)	13,435
Goose Creek and tributaries (compiled)	995
Evans Creek and its tributaries, Hufford or Jake's Creek, and Warm Springs (compiled)	6,820
Weeks or Steele Creek and tributaries (compiled)	6,010
White River and tributaries (adjudicated)	4,050
Spanish or Perry Aiken Creek (compiled)	1,430
Barber Creek and tributaries (compiled)	235
Duckwater Creek (by court decree)	2,335
Currant Creek (by court decree)	525
Carson River, below the Lahontan Reservoir (rights transferred to Government)	19,500
Miscellaneous sources	85,000
Total	632,700

Not all of the irrigated lands in Nevada for which there are vested rights are included in the proofs of appropriation that have been filed in the State Engineer's office. The total area of such land not included in proofs of appropriation is estimated, from such information as is available and from inspections that have been made, as 150,000 acres. In addition to this area there are at the present time about 20,000 acres of new land being irrigated under the Truckee-Carson Irrigation Project, in Lyon and Churchill Counties.

If we add to the above figures the 632,700 acres accounted for in proofs of appropriation, we have, for the approximate area of land in the State having water rights that were initiated prior to the creation of the office of State Engineer, a total of approximately 802,700 acres.

New Water Rights

To arrive at an estimate of the total area of land in the State that has been irrigated up to the present time, it is necessary to consider the areas of land that have been irrigated by virtue of permits granted by the State Engineer's office since the time it was created.

Of the rights that have been completed by applicants and for which certificates of appropriation have been issued, there are 9,560 acres.

The total area of land included in all the incomplete permits issued by the State Engineer's office, exclusive of those that are believed to be purely speculative and upon which no work has been done, is approximately 340,000 acres. It is estimated, from data available in the files and from field inspections, that at least 10 per cent of the area, or fully 34,000 acres, has been irrigated to date.

Thus the summation of the areas that enter into an estimate of the total area of irrigated land in the State would be as follows:

Rights initiated prior to creation of State Engineer's office	802,700 acres
Area included in certificates issued by the State Engineer's office	9,560 acres
Percentage of land that has been irrigated under incomplete permits	34,000 acres
Grand total	846,260 acres

RECOMMENDATIONS

At the present writing it would be anticipating the decision of the courts to make any recommendations regarding the law relating to the general determination of water rights. While it is confidently believed and hoped that the law will be held valid in the particulars in which it has been attacked, I do not feel justified in making any extended comments regarding it.

In the event the 1915 amendments are held valid, there would be no important recommendations to make. Perhaps it might be well to effect some minor changes in procedure, yet the failure to do so at the present session of the Legislature would not seriously impair the working efficiency of the Act.

There has been a serious question raised during the past year involving portions of the Act not attacked in any of the suits concerning the constitutionality of the law. It is generally recognized that there are two classes of water rights at the present time, viz: (1) Those acquired before the creation of the State Engineer's office, which are generally undefined, and (2) those acquired by and through applications to the office of the State Engineer, the priority and extent of which are immediately fixed by operation of law.

It is also generally conceded that there can be no regulation of water until the right is fixed. For years all water rights acquired by permit have been subjected to regulation immediately so as to guard against interference with prior rights. The authority of the office to act in such a manner has never been raised seriously until the past year, when a suit was instituted by the Humboldt-Lovelock Irrigation Light and Power Company to enjoin the regulation by the State Engineer of waters awarded to plaintiff on the ground that the right of regulation does not exist until the rights on the entire stream system, old and new, have been adjudicated.

Undoubtedly the court will decide the point in the near future. If the right to regulate new permits does not exist, and the court so holds, I most earnestly recommend that immediate steps be taken to express in clear and unmistakable statutory terms that established rights of every character be immediately subject to regulation, so that the holders of such rights will not, through mistaken ideas or otherwise, take water that clearly belongs to others.

This proposition is of greater importance than appears at first glance. Through the system of regulation of permit rights, I have witnessed a very large development of irrigated land in the past six years by permitting the use of streams claimed to have been fully appropriated, and this without in any way or manner affecting or impairing the old rights. If this development is to go on, it is appar-

ent that the new rights must be regulated as granted, without awaiting the general determination of priorities on the entire stream system, which, as we know, may take years to complete in complicated cases. It is a proposition of utmost importance to state development, and needs more than passing notice.

On the other hand, if such power of regulation is held not to exist under present laws, and not made so in express terms, hundreds of permit holders on various streams throughout the State will be faced with the prospect of swift and immediate injunction proceedings. The harm that will come to new water users is incalculable, and the burden that will be placed on the old water users can only be measured by the extent of counsel fees that they must pay in preventing the new users from taking water by court order. It seems to me, therefore, that the State will, under such circumstances, suffer irreparable injury.

The question is not a constitutional one, but merely one of statutory construction or legislation.

[Since the foregoing was written, Judge Farrington, of the Federal Court for the District of Nevada, has written a most exhaustive opinion upholding the constitutionality of the water statute in every respect. Thus the long-continued attack on the law has resulted in a complete victory for the State and the State Engineer's office.]

Reservation of Water Holes

There has been more or less agitation concerning the withdrawal from appropriation of all water holes and springs, chiefly valuable for stock-watering purposes. Undoubtedly this matter has been considered by the Federal Government, as I am advised that land office agents are in the field locating all unoccupied public lands containing springs, with the view of withdrawing the same from entry under the land laws. The advisability of setting aside all unappropriated springs and water holes of the character above mentioned must be carefully considered, owing to the conflicting range rights and the increasing value of the same. I would recommend that the matter be discussed in a conference consisting of those interested, and that a conclusion be entered of record as a persuasive guide for the Legislature. It is made more important in view of the fact that new land laws have recently been passed by Congress which permit the location of enlarged homesteads for range purposes, thus affecting range lands generally. It is evident that the springs and water holes valuable for stock purposes only are the controlling features of any stock range.

Basis of Charge for Distribution of Water

Prior to the year 1913 the charge for distributing water was made directly against and paid by the county in which the work was performed. This system is in force in most of the Western States, and recently has been recommended by the California State Water Commission as the method to be adopted there.

A change was effected by our 1913 Legislature, making the cost of distribution a charge against the water users in the district involved in proportion to the acreage for which rights are held.

This system, while theoretically correct, has developed certain defects which should be corrected. It seems generally satisfactory, but it so happens that persons owning lands in the district often receive no direct benefit from regulation, neither does the use of water by them affect others, so that they are not responsible for the necessity

of regulation. Those situated at the head of the stream obtain no direct benefit by regulation, for they are in a position to take the water as needed, hence the result of regulation in such cases is to limit the use of water in accordance with the actual rights. Consequently, when a direct assessment is made to pay for the work, there is more or less fault-finding with the system.

Owing to the difficulty involved in making the charge and collecting assessments from each of the water users, and owing to the difficulty in assessing certain classes of rights, I have come to the conclusion that there should be a modification of the basis for meeting the Water Commissioners' salaries.

The counties in which Water Commissioners are principally engaged are agricultural counties, and the greater part of the taxes are paid by the farmers, hence if the distribution of water is made a charge against the county directly, I believe that it will be generally satisfactory. The result of numerous conferences with farmers and taxpayers in the principal counties interested seems to be in accordance with the conclusion above mentioned.

CONCLUSION

Notwithstanding the fact that the office has been hampered by injunctions for some four years restraining the making of water-right determinations in accordance with the terms of the statute, the work of preparing the preliminary data has proceeded steadily, until at present we have practically completed the preliminary steps in the adjudication of the principal and largest stream systems in the State, viz, the Humboldt River, Salmon River, Little Humboldt River, and others heretofore specifically mentioned.

The net result so far of the injunction proceedings has been to make the work more expensive and to delay some of the larger final adjudications for the time being. However, by referring to the Oregon law reports, it will be noted that the water law of that State was subjected to the same character of attack as the Nevada Code. The result there has been to conclusively and finally establish the principle of administrative determinations and the law by the United States Supreme Court's decision, and we confidently hope that the same result will obtain here.

Due acknowledgment is given to the very efficient and loyal services of Seymour Case, Assistant State Engineer, and of the entire personnel of the office, whose names appear elsewhere in this report.

I desire to express my appreciation for the very warm support that you have given the State Engineer's department during the past two years, and I trust that the foregoing report of the conduct of the office will meet with your approval.

Respectfully yours,

W. M. Kearney

State Engineer.
