LETTER OF TRANSMITTAL

STATE OF NEVADA
OFFICE OF STATE ENGINEER,
CARSON CITY, July 24, 1952.

To His Excellency, HONORABLE CHARLES H. RUSSELL, *Governor of Nevada, Carson City, Nevada.*

SIR: In compliance with the provisions of section 14, chapter 140, Nevada Statutes 1913, I have the honor to transmit herewith the Biennial Report of the State Engineer for the period ending June 30, 1952.

Respectfully submitted,

State Engineer.

STATE ENGINEERS SINCE CREATION OF OFFICE

A. E. Chandler	May 29, 1903, to May 1, 1905
Henry Thurtell	May 1, 1905, to May 1, 1907
Frank R. Nicholas	May 1, 1907, to March 8, 1910
Emmet D. Boyle	March 8, 1910, to March 21, 1911
W. M. Kearney	March 21, 1911, to May 15, 1917
J. G. Scrugham	May 16, 1917, to January 10, 1918
Seymour Case	January 25, 1918, to March 28, 1919
J. G. Scrugham	March 28, 1919, to October 7, 1922
Robert A. Allen	October 7, 1922, to March 28, 1927
Geo. W. Malone	March 29, 1927, to May 28, 1935
Alfred Merritt Smith	May 29, 1935, to June 5, 1951
Hugh A. Shamberger	June 6, 1951–

OFFICIAL ROSTER DEPARTMENT OF STATE ENGINEER

OFFICE PERSONNEL

Carson City, Nevada

July 1, 1950, to June 30, 1952

ALFRED MERRITT SMITH[1]	State Engineer
HUGH A. SHAMBERGER[2]	State Engineer
ROBERT S. LEIGHTON[3]	Assistant State Engineer
EDMUND MUTH[4]	Assistant State Engineer
P. N. DONDERO	Deputy State Engineer
J. A. MILLAR[5]	Office Engineer
E. J. DEROCCO[6]	Field Deputy State Engineer
DONALD K. JEWETT[7]	Field and Office Engineer
HERBERT E. WINCHESTER[8]	Underground Water Hydrologist
CHARLES E. THIEX	Office Manager
ALTA C. THIEX[9]	Secretary
NANCY MCGUIRE[10]	Secretary
LORRAINE MATHEWS[11]	Stenographer
ANN E. PRICE[12]	Stenographer
FRANCES RICHARDS	Extra Clerical

WATER DISTRIBUTION PERSONNEL

Las Vegas and Pahrump Artesian Basins

HARRY E. JAMESON, Artesian Well Supervisor	1950–1952

Humboldt River, 1950

GEORGE HENNEN, Supervising Commissioner	Entire River
NELLO ALAZET, Assistant Supervising Commissioner	Entire River
GEORGE B. MOSLEY, Water Commissioner	Entire River
FRANCIS RAY KNICKREM, Water Commissioner	Battle Mountain
JOSEPH O. DAVIS, Water Commissioner	Paradise
GERALD WIGNAL, Gage Reader	Lovelock
LEE GRIENWALD, Commissioner and Hydrographer	Starr Valley, Elko County
MILTON G. VERMILLION, Hydrographer	Salmon River
WALTER REED, Hydrographer	Salmon River
MARION M. PARKER, Stenographer	Elko Office
BETTY ASHTON, Stenographer	Elko Office

[1]Retired June 5, 1951.
[2]Assistant State Engineer, July 1, 1950, to June 5, 1951; Appointed State Engineer, June 6, 1951.
[3]Appointed August 20, 1951; Resigned February 29, 1952.
[4]Special Deputy State Engineer, July 1, 1950, to February 28, 1952; Appointed Assistant State Engineer March 1, 1952.
[5]Retired April 30, 1951.
[6]Field and Office Engineer, July 1, 1950, to February 15, 1952; Appointed Field Deputy State Engineer, February 16, 1952.
[7]Appointed May 1, 1952.
[8]Appointed October 22, 1951.
[9]Stenographer July 1, 1950 to June 5, 1951; Appointed Secretary June 6, 1951.
[10]Resigned June 30, 1951.
[11]Resigned July 31, 1951.
[12]Appointed June 20, 1951.

Humboldt River, 1951

GEORGE HENNEN, Supervising Commissioner	Entire River
NELLO ALAZZI, Assistant Supervising Commissioner	Entire River
GEORGE B. MOSLEY, Water Commissioner	Entire River
FRANCIS RAY KNICKREM, Water Commissioner	Battle Mountain
ALBERT ORDE, Water Commissioner	Lamoille, District
HARRY FORCIER, Water Commissioner	Little Humboldt and Humboldt
ERNEST MILLER, Water Commissioner	Little Humboldt
STUART F. TRASKET, Water Commissioner	Humboldt
GERALD WIGNAL, Gage Reader	Lovelock
RALPH WESTAGARD, Gage Reader	Lovelock
LOUIS SEVER, Gage Reader	Palisade
BETTY ASHTON, Stenographer	Elko Office
THELMA COBB, Stenographer	Elko Office

Humboldt River, 1952

GEORGE HENNEN, Supervising Commissioner	Entire River
GEORGE B. MOSELEY, Assistant Supervising Commissioner	Entire River
COLE ACKER, Water Commissioner	Little Humboldt
DELYLE DANNER, Water Commissioner	Humboldt
THOMAS J. SMALES, Hydrographer	Elko District
MRS. C. L. CURRY, Gage Reader	Palisade
THELMA COBB, Stenographer	Elko Office

Duckwater and Currant Creeks, 1950–1952

JOHN RUTHERFORD, Water Commissioner	Entire District

Muddy River, 1950–1951

CLARENCE A. LEWIS, Water Commissioner	Entire District

Muddy River, 1952

CLARENCE A. LEWIS, Water Commissioner	Entire District
WENDELL E. HUTCHINGS, Water Commissioner	Entire District

Pahranagat Lake, 1950–1951

ALTON BINGHAM, Water Commissioner	Entire District

Pahranagat Lake, 1952

CLAYTON WADSWORTH, Water Commissioner	Entire District

Baker and Lehman Creeks, 1950–1951

HARRY E. HOSSELKUS, Water Commissioner	Entire District

White River, 1950

BILL HENDRIX, Water Commissioner	Entire District

SUMMARY OF THE WORK OF THE STATE ENGINEER

STATE COMMISSIONS AND BOARDS

The State Engineer, upon taking office, automatically becomes a member of the following Commissions:

1. The Nevada Public Service Commission.
2. The Nevada State Irrigation District Bond Commission.
3. The Nevada State Planning Board.
4. The State Range Commission.

RECLAMATION ORGANIZATIONS

1. The Association of Western State Engineers.
2. The National Reclamation Association.
3. Colorado River Water Users Association.
4. The Nevada State Reclamation Association.

STATUS OF ADJUDICATION OF STREAM SYSTEMS

The work of adjudicating the waters of the Nevada Stream Systems has proceeded since the inception of this office in 1903 to the present time:

1. Stream systems adjudicated, 1903 to date	39
2. Acres under adjudicated streams	389,199
3. Vested water users under adjudicated streams	621
4. Adjudicated stream systems supervised by this office during the past biennium	8
5. Adjudicated stream systems not supervised by this office during the past biennium	31
6. Streams in process of adjudication	9
7. Adjudications completed during past biennium	6
8. Stream systems on which decrees have been entered by civil suit not under supervision of this office	10
9. Stream systems adjudicated by United States District Court	4
10. Stream systems under process of adjudication by United States District Court	1

STATUS OF WATER APPLICATIONS AND PROOFS OF APPROPRIATION

1. Water applications filed, 1903 to June 30, 1952	14,381
2. Water applications acted upon, 1903 to June 30, 1952	13,891
3. Water applications on which no action has been taken	490
4. Water applications acted on, July 1, 1950, to June 30, 1952	935
5. Water applications filed, July 1, 1950, to June 30, 1952	950
6. Proofs of commencement of work filed, July 1, 1950, to June 30, 1952	443
7. Proofs of completion of work filed, July 1, 1950, to June 30, 1952	403
8. Proofs of beneficial use filed, July 1, 1950, to June 30, 1952	372
9. Protests filed against the granting of applications, July 1, 1950, to June 30, 1952	259

10. Certificates of appropriation issued under permitted water rights, July 1, 1950, to June 30, 1952 332
11. Proofs of appropriation filed, 1903 to June 30, 1952 2,387
12. Proofs of appropriation filed, July 1, 1950, to June 30, 1952 28

COOPERATIVE WORK

The State Engineer also carries on cooperative work in stream gaging, snow survey, and ground-water studies through three State appropriations. The cooperating agencies are:

The Water Resources Branch of the United States Geological Survey. Under this agreement the stream gaging and ground-water study programs are under two separate cooperative programs.

The Soil Conservation Service and the Nevada Agricultural Experiment Station relative to water supply forecasting and irrigation investigations.

Reports on this cooperative work are related under their proper headings elsewhere.

PUBLIC SERVICE COMMISSION

The Nevada Public Service Commission is composed of the following members:

Robert A. Allen, Chairman, Carson City.
Charles V. Williams, Member, Yerington.
Hugh A. Shamberger, Ex Officio Member, Carson City.
Lee S. Scott, Secretary, Carson City.

The work of this commission is published by the chairman in a biennial report. During the past biennium many hearings have been held in various parts of the State on matters concerning rate schedules of public utilities, rail and motor carriers, complaints as to public service, and requests for certificates of convenience and necessity for the operation of public utilities.

THE STATE IRRIGATION DISTRICT BOND COMMISSION

The State Irrigation District Bond Commission was created by an Act of the Legislature approved February 26, 1921, being sections 8217–8228, Nevada Compiled Laws 1929. The commission consists of the following members:

Charles H. Russell, Governor of Nevada.
Grant L. Robison, Bank Examiner.
Hugh A. Shamberger, State Engineer.

It is the duty of the commission to pass upon the eligibility of bonds of irrigation districts as legal investment within Nevada.

THE STATE RANGE COMMISSION

This commission consists of the following members:

Charles H. Russell, Governor of Nevada.
Robert A. Allen, Chairman, Public Service Commission.
Hugh A. Shamberger, State Engineer.

The 1929 Legislature created the "State Range Commission" for the purpose of determining the principles, laws, or policies that should

apply to the grazing use of the natural range forage resources of publicly owned lands within Nevada.

The work of this commission has been dormant, since the major part of the range area in Nevada has come under the supervision of the Taylor Grazing Division of the Department of the Interior. It should be noted, however, that in the areas not within Division of Grazing Districts the State Engineer bases decisions and makes rulings on water filings according to the Nevada Stockwatering Act of 1925.

NOTE: The State Range Commission was abolished by Assembly Bill No. 46, Chapter 34, 1951 Statutes.

BIENNIAL REPORT OF STATE ENGINEER 1950–1952

ACKNOWLEDGEMENTS AND RECOMMENDATIONS

ACKNOWLEDGEMENTS

The work of this office requires close association with many State and Federal agencies. The fine cooperation that we have received from these agencies and departments is reflected in the accomplishments of this office. Acknowledgements and sincere thanks are extended to the following agencies:

Soil Conservation Service.
U. S. Extension Service.
Nevada State Experiment Station.
Farmers Home Administration.
United States Geological Survey.
United States Indian Service.
United States Weather Bureau.
Bureau of Land Management.
United States Forest Service.
U. S. Bureau of Reclamation.
U. S. Corps of Engineers.
Federal Power Commission.
Nevada State Farm Bureau.

I am appreciative of the assistance given to us by Governor Charles H. Russell and Attorney General W. T. Mathews and their able staffs, as well as to other State departments.

Acknowledgements and thanks are also extended to our Representatives in Congress—Senator Pat McCarran, Senator George W. Malone, and Congressman Walter S. Baring—who are often called upon for aid and counsel.

On June 5, 1951, Alfred Merritt Smith retired from State work after some 16 years as State Engineer. It was my pleasure to work with "Tom" Smith as his deputy and assistant during those years, and I especially want to pay tribute to him here for his fine leadership and guidance during this long period of time.

On May 31, 1952, J. A. (Archie) Millar retired from this office after some 30 years of valuable service to the State.

I also wish to express my appreciation to my present staff for their untiring work.

RECOMMENDATIONS

Ground Water Law

Section 7a of the Ground Water Law should be amended to provide that well drillers as a prerequisite to obtaining a license to drill wells furnish a bond to guarantee proper compliance with the law.

Additional Assistance

In line with the "Water Resources Study," as outlined in Chapter VII, the Legislature should consider the advisability of making it possible for the State Engineer to obtain the services of a hydrologist who would work solely on this program.

Snow Surveys

It is recommended that the appropriation for the cooperative snow survey program be increased one thousand dollars a year.

Cooperative Ground-Water Studies

This program has been under way for several years and a great deal of progress has been made. It is recommended that this program be continued.

Cooperative Stream Measurement Work

This program has been underway for many years and its importance constantly increasing. The appropriation should be increased in line with the increase of costs.

Stock-Watering Act; Nevada Range Law

In view of the fact that practically all of the public domain is now under direct administration of Federal Agencies, consideration should be given by the Legislature towards amending the Stock-Watering Act (Chap. 201, Stats. 1925), and the Nevada Range Law (Chap. 226, Stats. 1931).

CHAPTER I

Objectives and General

OBJECTIVES

The objectives of this biennial report are:

(1) An accounting by the State Engineer to the Governor, the State Legislature and citizens of the State, his stewardship of the department for the biennial period;

(2) To present in condensed and concise form all essential data pertaining to water resources that have been recorded during the period;

(3) To familiarize the public with various duties and activities of the office of State Engineer;

(4) To perpetuate for future reference a resume of activities of the department that may not be permanently recorded in any other manner, and

(5) To itemize and describe problems affecting the proper utilization of the water resources and recommendations for the solution of such problems.

GENERAL

The office of State Engineer was created by Legislative Act in 1903, primarily for the purpose of providing a statutory procedure for the determination and regulation of existing water rights. In 1905 the Legislature provided a statutory procedure by which future water rights could be acquired and perfected by application to the State Engineer for permission to appropriate and apply water to beneficial use. The primary duty of this office then was the adjudication of vested water rights, the administration of the distribution of such waters, and the processing of applications to appropriate water. The work of this office has, within the past 10 years, been greatly increased, some in part by additions to the water law such as the Ground-Water Act, and some by its own initiative in attempting to develop the conservation and utilization of our water and land resources. A brief digest of the work of this office during the biennium is herewith given:

APPLICATIONS TO APPROPRIATE WATER—RELATED DOCUMENTS

A summary of the applications to appropriate water filed during the 1950–1952 biennium is covered in Appendix 3. To indicate the volume of work handled, a summary of the documents filed during the past four bienniums is herewith given:

	1941–1942	1946–1948	1948–1950	1950–1952
Applications filed	487	895	912	950
Protests filed	101	328	375	259
Proofs of appropriation filed	4	20	0	28
Proofs of commencement filed	241	349	350	443
Proofs of completion filed	175	290	450	403
Proofs of beneficial use filed	154	283	364	372
Certificates of appropriation	160	188	340	332

DISTRIBUTION OF WATER

Distribution of water under court decrees was handled by this office on the following streams during the 1950–1952 biennium:

Humboldt River.	Duckwater Creek.
Little Humboldt River.	Currant Creek.
Baker and Lehman Creeks.	Pahranagat Lakes.
White River.	Muddy River.
Virgin River.	Quinn River.
Thousand Springs Creek.	

A summary of this work is given in Chapter IV.

GROUND-WATER WORK

The 1951 Legislature provided money for the State Engineer to employ a ground-water hydrologist whose work would primarily be concerned with ground-water problems throughout the State. The addition of this personnel to the State Engineer's staff has aided materially in the work of this office. The cooperative program with the U. S. Geological Survey, Ground-Water Division, has been continuing and a report of this cooperative work is given in Chapter VI. During the past biennium there has been a great increase in ground-water development for irrigation purposes and many intricate problems are continually before us.

WELL DRILLERS

The Ground-Water Act of 1939, as amended in 1947, provides for the licensing of well drillers and the submission of well logs. During the fiscal year of 1951 there were 94 well drillers licensed. Since July 1, 1947 there have been 2,200 well logs filed, of which 904 were filed during the 1950–1952 biennium.

HUMBOLDT RIVER STUDY

The 1948–1950 Biennial Report described this study that was being carried on by legislative request. The study has now been completed and a report prepared and printed. Copies of this report are available upon request.

SUPERVISION OF DAMS

The 1951 Legislature supplemented the water law by adding thereto sec. 77½ providing for the supervision by the State Engineer on the construction of dams and the regulation thereof. Rules and regulations concerning this section have been prepared and printed and can be obtained from the Office of State Engineer.

WATER RESOURCES STUDY

The Office of State Engineer has embarked on a rather comprehensive program of inventoring our water resources and all statistical data relative to our water resources. Details of this program are given in Chapter V.

COOPERATIVE FEDERAL AGENCIES

The Office of State Engineer is carrying on cooperative programs with agencies of the Federal Government. These programs are:

Ground Water Studies (*See* Chapter VI).
Surface Water Gaging Programs (*See* Chapter VII).
Snow Surveys (*See* Chapter VIII).
Irrigation Studies (*See* Chapter IX).
Water Resources Program (*See* Chapter V).

IRRIGATION STUDIES—COLUMBIA RIVER BASIN

A cooperative program between the Soil Conservation Service and State Engineer was undertaken to determine the present consumptive use of water within the Columbia River watershed in Nevada. Also, to determine the acreage of irrigated lands as well as lands that could be irrigated. A progress report on this study is given in Chapter IX.

NEVADA WATER CONFERENCE

Starting in 1946 the State Engineer has been sponsoring yearly water conferences. At such conferences, all Federal and State Agencies concerned with water matters are invited to present a resume of their work in Nevada during the past year, as well as their plans for the coming year. In addition, round-table discussions are had on subjects of current interest to the water users and agencies dealing with water problems.

Copies of the proceedings of the Sixth Nevada Water Conference held September, 1951, are available, as well as proceedings of most of the earlier conferences.

The annual date for such water conference has been set for the last Thursday and Friday of each September.

The cooperation of the various interested agencies is to a very large measure responsible for the success of this conference.

CHAPTER II

Applications for Water Rights

During the biennium covered by this report, 950 applications to appropriate water were filed. During the 1948–1950 biennium, 912 applications were filed which was an all-time high. Protests to the granting of permits were filed on 119 applications. During the biennium, 74 rulings were issued covering 124 protested applications.

Office receipts during the 1950–1952 biennium amounted to $46,947.13. The receipts during the 1948–1950 biennium were $39,002.00; during the 1946–1948 period the receipts were $27,541.00; and during the 1944–1946 biennium the receipts amounted to $15,680.00.

Some 935 applications were acted upon during the 1950–1952 period. This represents action on 392 applications filed during this biennium and 543 filed prior to July 1, 1950.

Of the 950 applications filed during this period, 631 were to appropriate ground water, mainly for irrigation purposes. Many of these ground-water applications were filed to support desert land entries in Amargosa, Pahrump, Mesquite and Railroad Valleys in Nye County. Land unsuitability, as well as water limitations, will cause the withdrawal or denial of many of these.

MANNER OF USE COMPARISON

	1950–1952	1948–1950	1946–1948	1944–1946	1942–1944
Irrigation	615	503	328	159	96
Mining and milling	52	49	56	28	26
Stockwater	145	239	329	179	104
Domestic	18	36	54	13	7
To change point of diversion, etc.	53	55	43	27	26
Municipal	4	15	5	10	9
Power	1	5	8	1	
Fish rearing	1	14	8	5	
Manufacturing		2	5	1	3
Quasi-municipal	65	54	57	61	19
Others*	16		2	3	3
Totals	950	912	895	487	293

*Includes railroad, bathing, recreational, gravel washing, etc.

Pertinent information regarding water applications filed in this office since its creation will be found on page 9. The status of applications and certificates issued will be found under the following chapters:

1. Status of applications filed during the biennium, 1950–1952—Appendix 3.
2. Status of applications filed prior to July 1, 1950 upon which action has been taken during the past biennium—Appendix 4.
3. Certificates issued under permits during the 1950–1952 biennium—Appendix 5.

CHAPTER III

Adjudication of Water Rights

Section 1, Chapter 4, Statutes of 1903, provided a law creating the Office of State Engineer and furnished a method for the determination of the relative rights in and to waters already appropriated. Several amendments were subsequently made, with the result that our water law is now admirably adapted to conditions in Nevada, and has been declared constitutional in its entirety by decisions rendered by the Supreme Court of Nevada.

Amendatory Acts were passed during the 1907 and 1909 sessions of the Legislature. In 1913 a new water law was enacted and the old water law repealed in its entirety. The new law was approved on March 22, 1913. Under this Act the water law was greatly broadened, both as to the adjudication procedure on the determination of vested rights and the appropriation of water procedure by application to the State Engineer. Subsequent amendments to the laws relating to the adjudication procedure were enacted in the following sessions of the Legislature, viz., 1915, 1917, 1919, 1921, 1925, 1931, 1933, and 1937. A brief description of these various amendments may be found in Chapter 6 of the 1936-1938 Biennial Report, wherein a summary of the laws enacted by the Nevada Legislature relating to water and the Office of State Engineer is given. The statutory procedure to determine the relative rights in and to the waters of a stream system under a claim of vested right is set forth in sections 18 to 58 of the water law. A summary of this procedure may be found on page 65 of the 1952 *Compiled Water Laws of Nevada* which is available upon request.

PROOFS OF APPROPRIATION FILED DURING THE YEARS OF THE PRESENT BIENNIUM

During this period the following proofs of appropriation, which are claims of vested water rights, have been filed for future use in the determination of the relative rights and also to make a record of such claims. A condensed statement giving the salient data is herewith given in the order of:

1. Proof serial number.
2. Date filed.
3. Name of claimant.
4. Source of water supply.
5. Location by county.
6. Use claimed.

02362 8-25-50 John J. Casey; Stone Cabin Creek; Nye; stockwater.
02363 8-25-50 John J. Casey; Well No. 1 in Cactus Flat; Nye; stockwater.
02364 8-25-50 John J. Casey; Well No. 2 in Cactus Flat; Nye; stockwater.
02365 8-25-50 John J. Casey; Twin Mills Well; Nye; stockwater.
02366 8-25-50 John J. Casey; Well No. 3 in Cactus Flat; Nye; stockwater.
02367 8-25-50 John J. Casey; Stinking Spring; Nye; stockwater.
02368 8-25-50 John J. Casey; Fork Reservoir; Nye; stockwater.
02369 8-25-50 John J. Casey; North Antelope Reservoir; Nye; stockwater.
02370 8-25-50 John J. Casey; Antelope Reservoir; Nye; stockwater.
02371 8-25-50 John J. Casey; Nixon Water Hole No. 1; Nye; stockwater.
02372 8-25-50 John J. Casey; Nixon Water Hole No. 2; Nye; stockwater.
02373 8-25-50 John J. Casey; Tunnel Spring; Nye; stockwater.
02374 8-25-50 John J. Casey; Rose or Wild Horse Spring; Nye; stockwater.
02375 1-28-51 John J. Casey; Corral Spring; Nye; stockwater.
02376 1-29-51 John J. Casey; Silver Bow Spring; Nye; stockwater.

02377 1-29-51 John J. Casey; Broom Spring; Nye; stockwater.
02378 1-29-51 John J. Casey; Beatty Spring; Nye; stockwater.
02379 1-29-51 John J. Casey; Haws Creek Spring; Nye; stockwater.
02380 1-29-51 John J. Casey; Midway Well; Nye; stockwater.
02381 2-14-51 William and Elizabeth S. Babe; Bark Creek and Tributaries; Douglas; Irrigation.
02382 2-14-51 William and Elizabeth S. Babe; Folsom Springs and Trib.; Douglas; Irrigation.
02383 2-26-51 John J. Casey; Liberty Spring; Nye; stockwater.
02384 2-26-51 John J. Casey; Pole Reservoir; Nye; stockwater.
02385 4-12-51 John J. Casey; Reservoir No. 2; Nye; stockwater.
02386 4- 3-52 U. S. in Trust for certain Indians, Nevada Indian Agency; Idlewild Creek; Nye; stockwater.
02387 4- 3-52 U. S. in Trust for certain Shoshone Indians; Sunnyside Wash; Nye; stockwater.

ADJUDICATIONS IN PROCESS DURING BIENNIUM

KALAMAZOO CREEK

Kalamazoo Creek is located on the easterly slope of Sheel Creek Range in White Pine County, in and about Township 20 N., Range 66 E., M. D. B. & M. There are two claimants to the waters of this source, namely, B. H. Robison and George H. Eldridge.

January 20, 1948—Claimant B. H. Robison filed Exceptions to Order of Determination.

FRANKTOWN CREEK

Franktown Creek is located just westerly of Washoe Lake in Washoe County. Its source is the drainage on the easterly slope of the Sierra Nevada Mountains into Little Valley. There are some nine claimants who have consolidated their water rights by forming the "Franktown Creek Irrigation Company."

June 12, 1949—Petition by Franktown Creek Irrigation Company requesting the determination of the relative rights in and to the waters of Franktown Creek.

November 7, 1951—Report of field investigation filed.

November 7, 1951—State Engineer entered Order Granting Petition.

February 18, 1952—Notice of Order and Proceedings to Determine Water Rights.

NEWTON CREEK

Newton Creek forms on the westerly slope of the Washoe Mountains and flows westerly through the northeasterly portion of T. 17 N., R. 20 E.

September 10, 1948—Petition filed by Mary Wright Bain through her agent, Robert F. Guinn, requesting an adjudication and determination of the relative rights of the waters of Newton Creek and tributaries.

June 19, 1951—Report of field investigation filed.

June 20, 1951—Order of State Engineer Granting Petition.

June 21, 1951—Notice of Order and Proceedings to Determine Water Rights.

EGAN CREEK

Egan Creek heads in several springs on the west side of Telegraph Mountain in the Egan Range, White Pine County. It flows eastward into Steptoe Valley.

March 20, 1950—Petition filed by claimant, K. A. Barton, through his attorney, W. Howard Gray, to determine the relative rights of the various claimants to the waters of Egan Creek and tributaries.

June 2, 1950—Report of field investigation filed.

June 5, 1950—State Engineer entered Order Granting Petition.

October 2, 1951—Notice of Order and Proceedings to Determine Water Rights.

SOLDIER CREEK AND TRIBUTARIES

Soldier Creek and tributaries, including Mud Meadows, Donnelly Creek, artesian wells and other springs are located in the southwestern portion of Humboldt County. Soldier and Mud Meadows Creeks' system heads in the Black Rock Range approximately five miles southwest of Summit Lake. Mud Meadows lies directly below Soldier Meadows. Donnelly Creek heads on the west side of the valley and flows easterly into the valley.

August 13, 1951—Petition filed by Vern Parman, Ralph Parman and George Schadler requesting an adjudication of the relative rights to the waters of Soldier and adjacent streams.

February 11, 1952—Report of field investigation filed.

February 11, 1952—State Engineer enters Order Granting Petition.

LAST CHANCE, OPHIR, WISCONSIN AND SUMMIT CREEKS

These creeks head in the Toiyabe range in Nye County and flow to the east into Big Smoky Valley.

September 15, 1951—Petition filed by Will J. Farrington requesting a determination of the relative rights in and to this stream system.

October 18, 1951—Report of field investigation filed.

October 24, 1951—State Engineer enters Order Granting Petition.

October 26, 1951—Notice of Order and Proceedings to Determine Relative Rights.

NORTH AND SOUTH TWIN RIVERS

The Twin Rivers head in the Toiyabe mountain range in Nye County and flows in a northeasterly direction to the Big Smoky Valley.

September 15, 1951—Petition field by Will J. Farrington to determine relative rights in and to the waters of this stream system.

October 18, 1951—Report of field investigation filed.

October 24, 1951—State Engineer enters Order Granting Petition.

October 26, 1951—State Engineer gives Notice of Order and Proceedings to Determine Water Rights.

HOT CREEK

Hot Creek heads in the Hot Creek Range, Nye County, and flows southeasterly into Hot Creek Valley.

September 25, 1951—Petition filed by Victor J. Barndt, Elizabeth M. Crause, Sophie C. Cochran and Agnes M. Redenbaugh to determine the relative rights in and to Hot Creek and tributaries.

SWALLOW CREEK

Swallow Creek heads on the westerly slope of the Snake Range in White Pine County and flows westerly into Spring Valley.

September 21, 1951—Petition filed by Albin C. Kirkeby to determine the relative rights in and to the waters of Swallow Creek.

CHAPTER IV

Water Distribution

One of the principal duties of the State Engineer is to direct the distribution of the waters of the streams in the State according to the rights which have been allotted to the various claimants by court decrees. The cost of the actual distribution is borne by the water users on the stream system and only incidental administrative costs are paid for from State appropriations.

Stream flow records and irrigation water supplies are kept on a "water year" basis, the water year being from October 1 to the following September 30. Assuming that storage facilities are available this 12-month period represents the total water supply available for irrigation use during the irrigation season.

Since the water year and irrigation season do not conform to the fiscal year reporting it should be remembered that the following resume of the distribution of water throughout the State is on an irrigation season or water-year basis, and not a fiscal-year basis.

HUMBOLDT WATER DISTRIBUTION DISTRICT

Since January of 1947 the State Engineer has maintained a district water distribution office in Elko, Nevada. The area served by this office comprises Elko, Humboldt, Pershing and the north portions of Lander and Eureka Counties.

During the past biennium active work has been carried on on Thousand Springs Creek, Salmon River, Little Humboldt River and the Humboldt River.

THOUSAND SPRINGS CREEK

A limited study of the Thousand Springs Creek stream system was made during the 1951 irrigation season. The State Engineer was requested to distribute the water between the claimants according to the respective rights fixed in the 1929 court decree. It was found that the physical condition of the channel was such that water distribution was not possible. Before the waters can be properly distributed, headgates and measuring devices must be placed in all the diverting ditches and a great deal of work done on the stream channels to prevent uncontrolled diversion and flooding.

After determining that no satisfactory water distribution could be made, a water inventory study was started. Twelve staff gages were installed at selected sites and a record of the stream flow at these points was kept between March 21 and June 30 when the flow at all stations had practically ceased. Prior to March 21 there had been a heavy runoff which may have exceeded in volume the total flow measured during the recorded period. This early flow was retained in the "23 Mile Reservoir" which was rebuilt in 1950 after having been destroyed during the flood of February 21 to 28, 1943.

SALMON RIVER

No water studies were made on the Salmon River stream system during 1951 or 1952; however, the State Engineer, through the Hum-

boldt District, completed a water supply study during the 1950 irrigation season.

The State Engineer has been an active participant in the negotiations between the Nevada and Idaho water users to amicably settle their water controversy. An agreement has been reached and now is in its final stages of ratification. This agreement is a great step forward in the use of water and presents a new concept in settling water controversies.

LITTLE HUMBOLDT RIVER

Routine water distribution has been carried on on the Little Humboldt River stream system. For the most part there have been adequate water supplies during the past biennium to serve the irrigation needs. Extreme flood conditions during 1952 caused extensive damage to some farm land and to many of the irrigation structures. The full extent of the damage is not yet known. A full investigation will be made during the fall of 1952.

The U. S. G. S. gaging station on Cottonwood Creek was discontinued during 1951 because of a shortage of funds. Staff gage readings have been taken regularly during 1952 and will give some record of the 1952 floods.

Flood waters during the spring of 1952 were impounded in "Gumboot Lake" and caused considerable damage because of the backwater inundating and subing back into the farm lands. The recent high water showed the necessity of some type of outlet to the lake to prevent a reoccurrence of the damage.

HUMBOLDT RIVER

There have been adequate supplies of irrigation water on the Humboldt system during the past biennium. Some local shortages of water for stockwatering purposes occurred during the late summer months; however, in most instances, through close regulation it was possible to supply the water needed.

Priority charts on the entire Humboldt River have been prepared and checked for accuracy. An individual file has been prepared for each ranch property within the Humboldt Water Distribution District. This file will eventually contain all the pertinent information as to water supply and water delivered to the ranch.

Three additional recording stations have been established, two in Lamoille Valley on Thorpe and Talbot Creeks and the other on Rabbit Creek. These gages are used for distribution work as well as to obtain a record of water supply. Some additional recording stations are needed and will be established as time and funds permit. Fifteen or twenty staff stations have been established and periodic measurements are being made and discharge curves developed for each station. Stream-flow records are being compiled from the staff gage readings.

A report on the 1952 flood on the Humboldt River will be prepared and published as soon as the data can be collected and compiled.

CURRANT AND DUCKWATER CREEKS

Currant and Duckwater Creeks are regulated by the same water commissioner and have for years been considered more or less as a

unit. The administration costs, however, are assessed on the basis of the actual time and expense incurred in direct regulation of each stream.

For several years the State Engineer has carried on a program of having measuring devices installed and improving water diversion structures on both streams. This program will be completed this year. Some flood damage to the irrigation works on Currant Creek, due to the high water in the spring of 1952, has been reported. The extent of this damage is not known.

MUDDY RIVER

A field investigation was made on the upper Muddy River to determine what was needed to efficiently and properly distribute the water on the stream system. The investigation disclosed the need for measuring devices on the ditches, channel cleaning in some stretches of the stream, reconstruction of the Indian "tail ditch" and a more satisfactory type of diversion structure at some of the diversion points. The program has been discussed with the directors of the Muddy Valley Irrigation Company, and while nothing has been done to date, the greater portion of the required work should be completed during the coming biennium.

PAHRANAGAT LAKES

During the past few years the water users in Pahranagat Valley have made many major improvements to their irrigation systems. During the past biennium the Richardsville Ditch has been concrete lined (*See* 1948–1950 Biennial Report) and a four-foot Parshall flume was placed in the main channel below Reader Lake. The flume submerged during high water and will have to be reset during the coming year for proper operation.

It is expected that the long delayed work at Ash Springs will be started during the coming year. The proposed program will consist of regulatory works for lowering the spring pond so that cleaning can be done at regular intervals. Upon completion of this work the program of improvement, started some five years ago, will be completed.

BAKER-LEHMAN CREEKS

Stream flow records on Baker and Lehman Creeks are being obtained through the cooperation of the State of Utah, State of Nevada, and the U. S. Geological Survey. In addition, the State Engineer is obtaining twice daily staff gage readings at the Mt. Wheeler Ranch Parshall flume. From these records the loss of water is being determined as it is conveyed down the Baker Creek fan.

The installation of a small hydro-electric plant at Baker is still being actively considered under an R. E. A. program. If this project materializes, it should be of considerable benefit to the water users by preventing a large part of the present water losses.

VIRGIN RIVER—Clark County, Nevada

A "lower basin" tributary to the Colorado River, the Virgin River, has its source in southwestern Utah, flows a few miles through the northwest corner of Arizona and enters Nevada near the town of Mesquite and empties into Lake Mead.

The Virgin River Valley in Nevada is narrow and much of the flood plain cannot be utilized because of the shifting of the stream from one side of the valley to the other. If it was possible to stabilize the stream bed and supplement the late-summer stream flow, several thousand acres of land could be placed in cultivation. At present there are no active plans for any reclamation in this area.

The U. S. Department of the Interior, Bureau of Reclamation, has issued two reports covering the Virgin River in the States of Nevada, Utah and Arizona. The first report entitled "The Colorado River" is a comprehensive report on the entire Colorado River system and was released in March, 1946. Pages 181 to 187, inclusive, cover the Virgin Division which includes the Virgin River. Following this comprehensive report, a project planning report entitled, "The Dixie Project, Utah" was prepared and released in November, 1949. This report is now being revised and should be available for study within the next few months.

Nevada's concern over the proposed Dixie Project is principally with the time of flow and quality of the water that would be available to its water users under project operating conditions. The farming communities of Mesquite and Bunkerville obtain their irrigation water from the Virgin River, and while their supply of summer irrigation water would not be affected by the project (as it comes from springs rising below the project area), their spring season supply would be materially changed both in quantity and quality. Because of the poor quality of the summer irrigation water, large quantities of salts accumulate in the soil and unless sufficient water of good quality is available in the spring to wash out the salt accumulation of the previous year, the land would soon become useless.

In cooperation with the Mesquite and Bunkerville Irrigation Companies, the Nevada Colorado River Commission, the U. S. Geological Survey, and the Soil Conservation Service, the State Engineer has instituted a water supply and water quality study in the Virgin River area in Nevada. Two 4-foot Parshall flumes, equipped with water stage recorders, have been placed in the Bunkerville and Mesquite canals to determine the amounts and periods of use of water. These records will be published in U. S. G. S. water-supply bulletins. From these studies it should be possible to determine the water supply necessary to protect Nevada's farm lands in the event that the Dixie Project in Utah is constructed.

CHAPTER V

Nevada Water Resources Study

The need for an inventory of the water resources of Nevada has long been felt. Our basic industries are agriculture, stock raising, and mining. The future growth of these industries will depend on our water and land resources and how we use them. The actual task of making such a study and inventory would ordinarily require adequate appropriations to enable the State Engineer to employ the necessary personnel and expenses incidental thereto. In many States boards and commissions have been established by legislative Acts with sufficient appropriation to carry out such detailed work. Although the State Legislature may, at some future time, see fit to appropriate money for such work, it has been felt by the State Engineer that a method should be developed whereby such a program could be initiated and carried out by other means even though the progress may be slow.

This matter was first discussed before the Sixth Nevada Water Conference in September, 1952, and at that time a suggested program was discussed. Fortunately the various Federal and State agencies with whom the State Engineer is cooperating felt the need of such a program and offered their cooperation.

The plan as proposed and which is now being carried out on a moderate scale is as follows:

1. The accumulation from all sources of discharge measurements of springs and streams.
2. Compiling and documenting such measurements in specially prepared binders according to designated areas. Such listings to include stream, location, date of measurement, method of measurement, measured by, probable accuracy, and discharge.
3. The working out of a program whereby discharge measurements from all sources are submitted to the State Engineer's office for listing.
4. The gathering together and inventorying of water analyses, both surface and ground water.
5. Work out a program to obtain discharge records on streams where it appears such waters are not fully placed to a beneficial use, or where such information would be of value for ground-water studies.
6. To receive information as to the probability of small reservoir sites and to work out plans for water studies.

In general, the plan was to be divided into two parts: First—The accumulation and compiling of all existing data related to discharge measurements, ground-water studies, water analyses. Second—A continuing program for expanding our water measurement program and the collection of information necessary to enable an increase in the beneficial use of water.

As we proceeded with the program it was found desirable to inventory all reports dealing with our water resources—U. S. Weather Bureau records; U. S. Geological Survey gaging stations, past and present; topographic and geological mapping; and snow survey courses.

STATE OF NEVADA

In the records of the Office of State Engineer there are hundreds of stream and spring discharge measurements. No effort has heretofore been made to compile these measurements for ready reference. Some of the Federal and State agencies have made many discharge measurements, and it is planned to have these records submitted to the State Engineer to be recorded. It is proposed that in the future, stream and spring discharge measurements be submitted to the State Engineer. Such a procedure would, in a matter of years, enable the State Engineer to compile and have on record a great volume of such records in such a manner that easy reference could be made.

One of the first steps was the preparation of a map dividing the State into cartographic areas, subareas and drainage units, in accordance with topography, drainage and quality of water. In the preparation of such maps a great deal of service was rendered by George Hardman, State Conservationist, Soil Conservation Service, and Howard Mason, Agricultural Economist, Experiment Station. The State was divided into eight major areas which we termed "cartographic areas." These areas were subdivided into subareas and some of the subareas were further divided into drainage units. These areas are herewith listed and are shown in the map on page 27:

Area I—Sierra Nevada Basins.

Subarea A, Truckee River Basin—
- Drainage Unit 1—Pyramid Lake Area.
- Drainage Unit 2—Truckee Meadows Area.
- Drainage Unit 3—Washoe Valley Area.
- Drainage Unit 4—Lake Tahoe Area.

Subarea B, Carson River Basin—
- Drainage Unit 1—Buena Vista Valley Area.
- Drainage Unit 2—Fallon Area.
- Drainage Unit 3—Eagle Valley Area.
- Drainage Unit 4—Carson Valley Area.

Subarea C, Walker River Basin—
- Drainage Unit 1—Smith Valley Area.
- Drainage Unit 2—Mason Valley Area.
- Drainage Unit 3—Walker Lake Area.

Area II—Northwestern Basins.

Subarea A—Thousand Creek Area.
Subarea B—Quinn River Area.
Subarea C—Black Rock Desert Area.
Subarea D—Smoke Creek, Honey Lake Area.
Subarea E—Vya Area.

Area III—Snake River Basin.

Subarea A—Owyhee River Area.
Subarea B—Jarbidge, Bruneau River Area.
Subarea C—Salmon Falls River Area.
Subarea D—Goose Creek Area.

Area IV—Humboldt River Basin.

Subarea A, Upper River—
- Drainage Unit 1—North Tributary Area.
- Drainage Unit 2—South Tributary Area.

Subarea B, Middle River—
Drainage Unit 1—Little Humboldt River Area.
Drainage Unit 2—Rose Creek, Red House Area.
Drainage Unit 3—Rock Creek, Boulder Valley Area.
Drainage Unit 4—Pine Creek, Crescent Valley Area.
Drainage Unit 5—Reese River Area.
Drainage Unit 6—Grass Valley Area.
Subarea C, Lower River.

Area V—East Central Basins.

Subarea A—Thousand Springs Creek Area.
Subarea B—Ruby, Clover Valley Area.
Subarea C—Goshute, Antelope Valley Area.
Subarea D—Great Salt Lake Drainage Area.
Subarea E—Steptoe, Butte Valley Area.
Subarea F—Spring Valley Area.
Subarea G—Snake Valley Area.

Area VI—Central Basins.

Subarea A—Dixie Valley Area.
Subarea B—Smith Creek, Ione Valley Area.
Subarea C—Mina, Gabs Valley Area.
Subarea D—Fish Lake Valley Area.
Subarea E—Big Smoky Valley Area.
Subarea F—Clayton Valley Area.
Subarea G—Monitor, Diamond Valley Area.
Subarea H—Ralston Valley Area.
Subarea J—Railroad, Hot Creek Valley Area.
Subarea K—Newark, Little Smoky Valley Area.
Subarea L—Long Valley Area.
Subarea M—Penoyer Valley Area.

AREA VII—Colorado River Basin.

Subarea A—White River Valley Area.
Subarea B—Delamar, Cave Valley Area.
Subarea C—Meadow Valley Wash Area.
Subarea D—Pahranagat Valley Area.
Subarea E—Virgin River Valley Area.
Subarea F—Muddy River Basin Area.
Subarea G—Las Vegas Valley Area.
Subarea H—Searchlight, Piute Valley Area.

Area VIII—Death Valley Basin.

Subarea A—Sarcobatus Flat Area.
Subarea B—Amargosa Desert Area.
Subarea C—Pahrump, Mesquite Valley Area.
Subarea D—Ivanapah Valley Area.

All of the records compiled under this program will be indexed and filed under the respective areas.

The State Engineer has obtained a certain type of binder books. Printed sheets have been prepared for compiling discharge measurements. Other sheets titled "Statistical Data Sheets" have been prepared for recording such data as reports, weather stations, etc. The

binders are divided into the eight cartographic areas and these areas in turn are divided into subareas and drainage units. If, for instance, anyone desiring to find out if there has ever been a ground-water report in, say Whiskey Flat, would by refering to the map determine that Whiskey Flat was in Area No. I. He would then go to the binder marked "Area I" and turning to the statistical reference sheet listing all ground-water reports in that area, find that a report of such an area had been made in 1950 and could be found in Drawer S-9 under I-9. The same procedure would be followed in looking up any statistical information relating to water or allied subjects.

COMPILATION OF WATER ANALYSES

On any water study the quality of water is of great importance. Many analyses have been made of waters in Nevada, some of which have been documented in various publications. A large number of the analyses, however, have never been published and in some instances the published records are out of print. It was felt that as a part of our water resources study, and before many of the records containing such analyses are lost, an effort be made to obtain from all sources all of the water analyses that had been made and publish them.

The Nevada Experiment Station offered to pay the publication costs as well as to assist in the compilation of the records. Work was started by the Experiment Station in cooperation with the Soil Conservation Service and the Office of State Engineer. Mr. M. R. Miller, for many years chemist for the Experiment Station and now on retirement, was engaged to compile the records for publication as well as to help prepare the text. Other parts of the text will be written by George Hardman of the Soil Conservation Service.

Nearly two thousand water analyses have been compiled from many sources. In the publication, which will be issued as an Experiment Station bulletin, the analyses will be listed in accordance with the cartographic areas, subareas and drainage units. The material will be submitted to the State Printer within the next two months.

RUNOFF DATA

Very little study has been made anywhere to determine the amount of surface water reaching the valley fill from precipitation on the watersheds. Such data is essential in the study of our ground-water resources. The State Engineer has suggested certain definite studies in order to obtain this information. The study would require the selection of certain catchment areas where stream-flow measurements would indicate the total runoff. In addition, it would require the installation of precipitation storage gages as well as the conducting of snow survey studies. The U. S. Weather Bureau has offered their cooperation in furnishing several storage gages and also in the proper installation of such gages. The Soil Conservation Service will assist in the snow survey program.

Several sites have been under consideration which we feel will be ideal for such studies. The first work will be done in the Pole Creek drainage area which is on the easterly slope of the Sonoma Range just easterly of Winnemucca. Other sites would include Martin Creek,

just northerly of Paradise Valley in Humboldt County, and Reese River drainage on the westerly slope of the Toiyabe Range.

With measurements of the precipitation in the form of rain and snow, and of the resultant runoff, a few years of records should give us valuable information that would be useful in other drainage areas.

PRECIPITATION RECORDS

It has long been felt that precipitation records in Nevada are inadequate, especially for the higher elevations. The U. S. Weather Bureau, realizing this, has offered to cooperate as much as they can. This program, like the others, will not develop too rapidly but by adding a few stations each year, definite progress will be made.

SMALL RESERVOIR SITES

There are many small streams draining from the high mountain ranges which at present debouch upon and waste their waters into the adjacent valley areas. It is our belief that many of these streams could be developed into a valuable adjunct to the State's irrigation needs by the construction of small dams. Every stream of any magnitude should be considered with the idea of putting it to use. The Federal agencies will lend their assistance in reporting areas where it believes conditions appear favorable for development. The initial step on any stream, if other conditions appear favorable, would be to take steps to determine the stream-flow characteristics. Usually such streams flow no more than a few hundred or one or two thousand acre-feet per year, and the major portion of such flow occurs in the spring as a result of snow melt. Much of this early runoff is generally useless for irrigation, being available at the wrong time and in the wrong amounts. Naturally the status of the stream must be considered under its present conditions. Perhaps there are two or more users on the stream and all the water is appropriated. Or again, perhaps such water is the source of an underground reservoir that has been developed by pumping. These are things that of course must be taken into consideration.

During the past two years several small dams have been constructed, or proposed, on minor streams in Nevada, and as far as we know those that have been constructed have proved beneficial. The matter of obtaining information on possible small storage projects, and then to follow this up by investigations as to stream discharge, is important because it will first tend to bring the possibility of an increased water supply to the attention of the persons who would benefit and thereby hasten construction of such projects. A small project should be just as attractive for development as a larger one if it can be shown to be economically feasible.

SUMMARY

The program as outlined is, we believe, a progressive one. True, the work will be slow. Nevertheless, by keeping the objectives in view, and with the wholehearted support of the Federal and State agencies in supporting such a program, benefits should soon be evident and we will be collecting data that are absolutely necessary in order to inventory our water resources and place them to the greatest use.

CHAPTER VI

Cooperative Ground-Water Investigations in Nevada

By Oman J. Loeltz, *Acting District Engineer, United States Geological Survey, Water Resources Division, Ground-Water Branch.*

The State-wide program of investigating the ground-water resources of Nevada, in cooperation with the State Engineer, was begun in July 1945 as a result of an appropriation by the State Legislature of $35,000 for the fiscal biennium beginning at that time. As a result of local cooperation through the State Engineer, ground-water investigations had been in progress in Las Vegas and Pahrump Artesian Basins since July 1944. These studies were incorporated into the State-wide cooperative program. To continue the cooperative program the Legislature appropriated $40,000 for the fiscal biennium beginning July 1, 1947, $30,000 for the biennium beginning July 1, 1949, and $15,109 for the biennium beginning July 1, 1951.

As a result of the reduction of funds for the biennium beginning July 1, 1951, it has been necessary to reduce the number of personnel working in the cooperative program. This has resulted in a consequent decrease in the rate at which the ground-water resources of the State can be ascertained. As of June 30, 1951, the scientific personnel of the U. S. Geological Survey to carry out the State-wide program consisted of an engineer and a geologist.

Since July 1944 some phase of ground water has been investigated in nearly every part of the State. The work of the ground-water program generally falls into one of three categories: (1) Detailed studies of ground-water conditions in selected valleys or areas. These studies are made on the basis of need for information of existing or anticipated development of ground water. They include available significant geologic data as related to ground water, a discussion of the occurrence, source, and movement of ground water and its chemical quality, and quantitative estimates of recharge, discharge, and amount available for development. (2) Reconnaissance studies of undeveloped areas or valleys. These studies are qualitative in nature and are made principally to determine whether conditions for the development of ground water are favorable. (3) Furnishing information about ground water as the result of special requests. These requests come from individuals, industrial concerns, municipalities, local, State and Federal civilian and military agencies. They range from requests for information regarding the drilling of a stock or domestic well to the feasibility of obtaining adequate supplies for national defense installations, or large-scale irrigation projects. About 210 such inquiries were received during the biennium 1950–1952.

In order to make the results of investigations available to the public, reports are prepared and published as the study of each area is completed. Most of the reports have been published by the State Engineer as one of a series of State of Nevada Water Resources Bulletins. A few of the briefer reports have been mimeographed and a few typewritten. Those in mimeographed form are limited as to the quantity available for distribution and those typewritten are available generally

to the public only by consulting the copy on file at the district office or at the Washington office of the Geological Survey.

The following reports are available to the general public:

Progress Report on the Ground-Water Resources of Las Vegas Artesian Basin (mimeographed). 1945.

Water Resources Bulletin No. 2. Ground Water in Lovelock Valley, Nevada. 1946. (Out of print.)

Water Resources Bulletin No. 3. Water Levels and Artesian Pressure in Wells in Las Vegas Valley and Other Valleys in Nevada, 1931–1945. 1947.

Ground Water in the Vicinity of Elko, Nevada (mimeographed). Also included in Water Resources Bulletin No. 12, 1951. 1947.

Water Resources Bulletin No. 4. Well Data in Las Vegas and Indian Spring Valleys, Nevada. 1947.

Water Resources Bulletin No. 5. Geology and Water Resources of Las Vegas, Pahrump, and Indian Spring Valleys, Clark and Nye Counties, Nevada. 1948.

Water Resources Bulletin No. 6. Ground Water in Las Vegas, Pahrump, and Indian Spring Valleys, Nevada. (A summary.) 1947.

Water Resources Bulletin No. 7. Geology and Ground Water in the Meadow Valley Wash Drainage Area, Nevada, Above the Vicinity of Caliente. 1948.

Geology of Clear Creek Dam Site, Ormsby and Douglas Counties, Nevada. (Typewritten manuscript.) 1948.

Ground Water in Spanish Springs and Sun Valleys, Washoe County, Nevada. (Mimeographed.) 1948.

Ground Water Conditions in the Vicinity of Tonopah, Nye County, Nevada. (Typewritten manuscript.) 1948.

Ground Water Appraisal for Stock Water on the West Slope of Black Mountain, Mineral County, Nevada. (Typewritten manuscript.) 1948.

Ground Water in Goshute-Antelope Valley, Elko County, Nevada. (Mimeographed.) Also included in Water Resources Bulletin No. 12, 1951. 1948.

Test-Well Drilling in Argenta Swamp, Lander County, Nevada. (Typewritten manuscript.) 1949.

Water Resources Bulletin No. 8. Ground Water in White River Valley, White Pine County, Nye, and Lincoln Counties, Nevada. 1949.

Water Resources Bulletin No. 10. Ground Water in Paradise Valley, Humboldt County, Nevada. 1949.

Ground Water in the Austin Areas, Lander County, Nevada. (Typewritten manuscript.) 1949.

Ground Water in Nevada (Quarterly of the Colorado School of Mines). 1950.

Ground-Water Conditions in Whisky Flat, Mineral County, Nevada. (Mimeographed.) 1950.

Ground Water for Indian Service Hospital at Schurz, Nevada. (Mimeographed.) 1950.

Water Resources Bulletin No. 11. Preliminary Report on Ground Water in Fish Lake Valley, Nevada and California. 1950.

Water Resources Bulletin No. 12. Contributions to the Hydrology of Eastern Nevada. Includes the following reports: Ground Water in Goshute and Antelope Valleys, Elko County, Nevada; Ground Water in the Vicinity of Elko, Nevada; Ground Water in Ruby Valley, Elko and White Pine Counties, Nevada; Ground Water in Clover and Independence Valleys, Elko County, Nevada; Ground Water in Railroad, Hot Creek, Reveille, Kawich and Penoyer Valleys, Nye, Lincoln and White Pine Counties, Nevada. 1951.

Ground Water in the Vicinity of Verdi, Washoe County, Nevada. (Mimeographed.) 1951.

At the close of the biennium, 15 investigations in 14 counties are at various stages of completion. For most, the field work is from 50 to 100 percent complete. The preparation of reports is somewhat behind these stages.

A report entitled, "Geology and Water Resources of Smith Valley, Lyon and Douglas Counties, Nevada" has been submitted to the Director of the Geological Survey for approval to be released to the public as a Geological Survey Water-Supply Paper. It is expected

that this report will be available for distribution in calendar year 1953. When available, this report will be obtainable from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

In addition to the study of specific areas, a State-wide network of observation wells is maintained. Some of the wells are measured monthly, some quarterly, almost all semiannually, and a few annually. The semiannual measurements are made in February or March and August or September, when maximum or minimum stages of water level ordinarily occur. In calendar year 1951, 1,104 measurements were made in 279 selected observation wells. In addition, continuous records of water-level fluctuations were obatined in 12 wells equipped with recording gages. As the years go by, the record of water-level fluctuations becomes increasingly valuable for evaluating ground-water conditions. These records of water-level fluctuations have been compiled and interpreted and will be published in Geological Survey Water-Supply Papers. One report covers the period 1946 to 1950, inclusive. It will be published in the Water-Supply Paper, 1170, entitled, "Water Levels and Artesian Pressure in Wells in the United States, Part 6, Southwestern States, 1950." The other report covering the calendar year 1951, will be reported in Water-Supply Paper 1196. This phase of the program is supported in part by unmatched Federal funds.

A comprehensive inventory showing the amount of ground water developed in the various valleys of the State has been maintained since 1946. This inventory not only charts the growth of ground-water development but is often very useful in interpreting the fluctuations of water levels in a specified area.

In 1951 the withdrawal of ground water for irrigation by wells, except where noted, was estimated to be as follows in the areas specified:

County	Area	Withdrawal (acre-feet)
Clark	Las Vegas Valley	13,700
	Muddy River Valley	3,250
Douglas	Carson Valley	3,500
	Antelope Valley	400
Elko	Willow Creek drainage	240
	Humboldt River Valley near Elko	80
Esmeralda	Fish Lake Valley	3,250
Eureka	Crescent Valley	550
	Diamond Valley	4,300
Humboldt	Paradise Valley	1,400
	Quinn River Valley	1,000
Lander	Carico Lake Valley	215
	Reese River Valley	430
Lincoln	Meadow Valley Wash	3,500
	Vicinity of Caliente	1,100
	Pahranagat Valley	1,000
Lyon	Carson River Valley below Dayton	1,500
	Mason Valley	50
	Smith Valley	215
Nye	Pahrump Valley	*18,000
	Big Smoky Valley	1,200

*Includes approximately 5,000 acre-feet of flow from springs.

County	Area	Withdrawal (acre-feet)
Pershing	Buena Vista Valley	600
	Grass Valley	170
	Humboldt River Valley	157
White Pine	Steptoe Valley	600
	White River Valley	1,700

The total of the above figures, 62,077 acre-feet, would be increased considerably if the list were complete and ground-water withdrawals for municipal, mining, industrial, domestic and stock use were included. For example, in Las Vegas Valley domestic, municipal, and industrial use is estimated at somewhat more than 20,000 acre-feet in 1951.

With the limited number of personnel, it is impossible to make a physical check of withdrawals from all wells. It will be necessary to rely more and more on the cooperation of individual owners, municipalities, power companies, and other agencies in furnishing the required data. In past years, this cooperation has been remarkably good.

There has been a gradual increase in the development of underground water since the inventory was started in 1946. More and more ranchers and farmers in more areas are finding it profitable to use ground water to supplement their surface-water supplies or to put new land into cultivation. Industrial concerns, mining companies, and municipalities are making an ever increasing demand on the ground-water resources of the State.

CHAPTER VII

Cooperative Stream Measurement Work in Nevada

By L. R. Sawyer, *Engineer-in-Charge, United States Geological Survey Water Resources Division, Surface Water Branch.*

The investigation of surface-water resources carried on under the Nevada–U. S. Geological Survey cooperative program is fundamentally the collection of basic data, including records of stages and discharges, relating to surface water supplies. The efficient and orderly development of all resources of the State is dependent on reliable and comprehensive water-supply data. Agriculture, mining, power production, the tourist industry, and even life itself is ultimately dependent on the available water supply.

The Congress of the United States has recognized the Federal responsibility for the development of the water resources of the country and since 1905 has appropriated funds for cooperative investigations of these resources with the States and other political subdivisions. These appropriations are available only for cooperative work requested by State and local interests, and it is therefore important that the present and future needs of the State and local interests be carefully considered in planning and financing these water resources investigations.

The cooperative stream gaging program is closely connected with the investigation of ground-water resources reported in Chapter VI. Records of stream flow are used to determine the recharge to ground-water reservoirs, and ground-water supplies are available for supplementing runoff. Close coordination of these two programs is therefore maintained.

Water resource data to satisfy all needs were not available and six gaging stations were constructed during the biennium to secure more complete information. Three of these gaging stations are located in the Virgin River Basin, two in the Humboldt River Basin, and one on Prosser Creek near Boca, California, in the Truckee River Basin. Three of these stations were financed under the State Cooperative Program and three by Federal appropriation for the collection of basic water-supply data.

The State of California continued its appropriation of $1,000 for operation of gaging stations in the Carson and Truckee River Basins.

Outstanding floods occurred in November and December 1950 in the Walker, Carson and Truckee River Basins, and in April and May 1952 in the Humboldt River Basin. Flood stages and discharges during these floods were the maximum recorded at many gaging stations. For example, on West Walker River below East Fork near Coleville, California, the maximum discharge previously recorded was 5,800 second-feet on December 11, 1937. The maximum on November 20, 1950 was 6,220 second-feet. On the East Fork Carson River near Gardnerville, Nevada, the maximum previously recorded was 12,000 second-feet on December 11, 1937, and the maximum of November 21, 1950 was 12,100 second-feet. On the Truckee River at Reno the maximum previously recorded was 14,600 second-feet on March 18, 1907,

and the maximum recorded on November 21, 1950 was 19,900 second-feet. Our record for this station does not include 1937, but there is some evidence that indicates that the 1937 maximum was somewhat less than that of 1950.

Stages and discharges of the Humboldt River and its tributaries during April and May 1952 were also of record proportions. For example, the Humboldt River at Palisade reached a crest discharge of 6,020 second-feet on May 2, 1952, only slightly less than the 44-year maximum of 6,250 second-feet recorded on February 25, 1943.

Reports of stream flow and runoff forecasts were made weekly to the Corps of Engineers and other interested parties during the runoff periods, in order that all protective measures possible might be taken.

Continually rising costs have forced some curtailment of the program and seven gaging stations, as shown in the list following, were discontinued during the biennium.

Surface-water supplies for the period covered by this report were generally good. Records for the base gaging station on the Humboldt River at Palisade for the water years ending September 30, 1950 and 1951 show that the discharge was 123 and 156 percent, respectively, of the 39-year normal. Runoff from the West Walker River, draining from the Sierra Nevada, was 93 percent and 136 percent of its 37-year normal for the same periods.

The detailed information collected as a result of these cooperative investigations is published in the annual water-supply papers of the Geological Survey. The published reports are available for consultation at the State Engineer's Office, the State Library, and the Geological Survey suboffice at Carson City, and also at several district offices of the Survey, in addition to many educational institutions and public libraries scattered throughout the States. Current data in advance of publication and information for previous years can be furnished in blueprint form on application to the Engineer-in-Charge, P. O. Box 327, Carson City, Nevada.

The gaging stations operated in and for the State of Nevada are listed below. Locations and descriptions of these stations are given in the report of the State Engineer for the biennium 1944–1946, except for stations installed during the biennium 1946–1948 which are described on page 37 of that Biennial Report, and those installed during the biennium 1948–1950 which are described on page 55 of that report and those installed during the biennium 1950–1952 hereinafter described.

SALMON FALLS CREEK BASIN

Salmon Falls Creek near San Jacinto.

OWYHEE RIVER BASIN

Wild Horse Reservoir near Gold Creek.
Owyhee River near Gold Creek.
Owyhee River near Owyhee.

HUMBOLDT RIVER BASIN

Humboldt River near Elko.
Humboldt River near Carlin.
Humboldt River at Palisade.

Humboldt River near Argenta.
Humboldt River at Battle Mountain.
Humboldt River near Valmy.*
Humboldt River at Comus.
Humboldt River near Rose Creek.
Humboldt River near Imlay.
Rye Patch Reservoir near Rye Patch.
Humboldt River near Rye Patch.
Humboldt River near Lovelock.
Marys River below Hot Springs Creek near Deeth.
Lamoille Creek near Lamoille.
North Fork Humboldt River at Devils Gate near Halleck.
South Fork Humboldt River near Lee.
South Fork Humboldt River near Elko.
South Fork Humboldt above Dixie Creek near Elko.
Huntington Creek near Lee.
Pine Creek near Palisade.
Rock Creek near Battle Mountain.
Reese River near Ione.*
Little Humboldt River near Paradise Valley.
Little Humboldt River at Chimney Dam Site near Paradise Valley (Discontinued November 15, 1951).
Martin Creek near Paradise Valley.
Cottonwood Creek near Paradise Valley (Discontinued October 24, 1951).
Humboldt-Lovelock Irrigation Light & Power Company's Feeder Canal near Imlay.

QUINN RIVER BASIN

Quinn River near McDermitt.
East Fork Quinn River near McDermitt.
McDermitt Creek near McDermitt.

PYRAMID AND WINNEMUCCA LAKES BASIN

Pyramid Lake near Nixon.
Truckee River at Tahoe, California.
Truckee River near Truckee, California.
Truckee River at Farad, California.
Truckee River at Reno.
Donner Creek near Truckee, California.
Little Truckee River near Hobart Mills, California.
Prosser Creek near Boca, California.*
Franktown Creek at Franktown.

CARSON RIVER BASIN

East Fork Carson River near Markleeville, California (Discontinued October 15, 1951).
East Fork Carson River near Gardnerville.
Carson River near Carson City.
Carson River near Fort Churchill.
Silver King Creek near Coleville, California (Discontinued October 17, 1951).

*Gaging stations established during the biennium.

Wolf Creek near Markleeville, California (Discontinued October 18, 1951).
Silver Creek near Markleeville, California.
Markleeville Creek near Markleeville, California.
Pleasant Valley Creek near Markleeville, California (Discontinued November 19, 1950).
West Fork Carson River above Woodfords, California (Discontinued November 20, 1951).
West Fork Carson River at Woodfords, California.
Clear Creek near Carson City.

WALKER LAKE BASIN

Walker Lake near Hawthorne.
Bridgeport Reservoir near Bridgeport, California.
East Walker River near Bridgeport, California.
East Walker River near Yerington.
West Walker River below East Fork near Coleville, California.
West Walker River near Hudson.
East Fork West Walker River near Bridgeport, California.
Topaz Reservoir near Topaz, California.

VIRGIN RIVER BASIN

Virgin River at Littlefield, Arizona.
Bunkerville Canal near Bunkerville.*
Mesquite Canal near Mesquite.*
Muddy River near Moapa.
Muddy River near Glendale.
Meadow Valley Wash near Caliente.*

COLORADO RIVER MAIN STREAM

Lake Mead at Hoover Dam.
Colorado River below Hoover Dam.

MINOR BASINS

Baker Creek near Baker.
Lehman Creek near Baker.

Fifty-three of these gaging stations are financed under the cooperative program, with State, Federal, and local water users' funds, and twelve by Federal noncooperative funds.

The gaging station on Salmon Falls Creek near San Jacinto is operated under the supervision of T. R. Newell, District Engineer for the U. S. Geological Survey in Boise, Idaho, and is operated in cooperation with the Salmon River Canal Co., Ltd., of Twin Falls, Idaho. The two gaging stations on the Colorado River are operated under cooperative agreement between the Bureau of Reclamation and the U. S. Geological Survey Office at Tucson, Arizona, in charge of District Engineer John Gardiner. The gaging station on the Virgin River at Littlefield, Arizona, is also under the supervision of Mr. Gardiner. Records for gaging stations Nos. 2, 4 and 6 in the Pyramid and Winnemucca Lakes Basin are furnished by Walter Bell, Federal Court Watermaster. Records for Carson River at Fort Churchill are furnished by the Newlands Project.

*Gaging stations established during the biennium.

Location and Description of Gaging Stations Established During the Biennium, 1950–1952

HUMBOLDT RIVER BASIN

Reese River Near Ione

Location. Water-stage recorder, lat. 38°51′, long. 117°28′, in sec. 4, T. 11 N., R. 40 E., 2½ miles upstream from Indian Creek, 8 miles southeast of Ione, and 58 miles southwest of Austin.

Remarks. Established August 5, 1951. Records at this station will not be equivalent to those obtained in 1913–1916 at former station near Berlin, 3½ miles downstream, because Indian Creek enters between the two locations and also because of diversions between the sites.

This station has been named near Ione, partly to distinguish it from station published as near Berlin, and partly because Berlin is a long dormant mining town, no longer shown on most maps.

Humboldt River Near Valmy

Location. Water-stage recorder, lat. 40°48′, long. 117°04′, in NE¼ NW¼ sec. 30, T. 34 N., R. 44 E., 3½ miles east of Valmy and 13 miles northwest of Battle Mountain.

Remarks. Established March 1, 1950.

TRUCKEE RIVER BASIN

Prosser Creek Near Boca, California

Location. Water-stage recorder, lat. 39°22′, long. 120°07′, in NW¼ sec. 32, T. 18 N., R. 17 E., a quarter of a mile upstream from mouth and 2 miles southwest of Boca.

Remarks. Reestablished June 12, 1951. Records at this station are equivalent to those obtained in 1889–1890; 1902–1903 at practically the same site.

VIRGIN RIVER BASIN

Bunkerville Canal Near Bunkerville

Location. Water-stage recorder, lat. 36°47′, long. 114°06′, in NE¼ sec. 19, T. 13 S., R. 71 E., 100 feet downstream from bridge on U. S. Highway 91 and 2¼ miles northeast of Bunkerville.

Remarks. Established March 31, 1951.

Mesquite Canal Near Mesquite

Location. Water-stage recorder, lat. 36°48′, long. 114°03′, in sec. 5, T. 39 N., R. 16 W., Gila and Salt River Meridian, 2¼ miles downstream from point of diversion and 1½ miles east of Mesquite.

Remarks. Established March 29, 1951.

Meadow Valley Wash Near Caliente

Location. Water-stage recorder, lat. 37°33′, long. 114°34′30″, in NE¼ sec. 3, T. 5 S., R. 66 E., Mount Diablo Meridian, 7 miles southwest from Caliente, Nevada, 1 mile south of Etna.

Remarks. Established January 18, 1951.

CHAPTER VIII

Nevada Cooperative Snow Surveys

By Clyde E. Houston, *Irrigation Engineer, Division of Irrigation Engineering, S.C.S., Research, Reno.*

This program is cooperative under a formal agreement between the State Engineer, Agricultural Experiment Station, and Division of Irrigation Engineering, S.C.S. Research.

During the past biennium, the snow survey program was carried on with very little change over the preceding years. One hundred and one snow courses are located in the following drainage basins:

Snake River	3	Central Great Basin	3
Owyhee River	4	Lower Colorado River	7
Upper Humboldt River	18	Walker River	8
Lower Humboldt River	11	Carson River	4
Northern Great Basin	2	Truckee River	17
Eastern Nevada	10	Tahoe Basin	14

Local forecast meetings again were held during the first week of April in Elko, Winnemucca, Lovelock, Minden, Fallon, and Yerington.

The 1951 forecast for irrigation season stream flow varied from drought conditions in Central and Southern Nevada to about 50 percent above normal in the north on the main Humboldt. Snow-melt runoff from the Eastern Sierra Nevada was forecast from 25 to 50 percent of normal.

Preliminary stream-flow measurements by the U. S. Geological Survey indicate the Humboldt forecasts were high and the Sierra were low. The drought in Central and Southern Nevada continued unabated.

Climatological data at five representative stations in the Upper Humboldt Basin show that during the months of April, May, and June, average temperature was about three degrees below normal. This undoubtedly had a retarding effect on the melting of snow at higher elevations.

As for the error in the Sierra forecasts, it appears that insufficient weight was given to the 350 percent of normal precipitation which occurred during the storms of November and December 1950. Correlation studies are continuing to detect these discrepancies.

One snow course above Fish Lake Valley was abandoned. A new snow course has been established about one-half mile west of Donner Lake as a replacement for an existing course which has been disturbed by new roads and newly constructed summer homes. Two snow courses were established on Mt. Grant above Hawthorne to assist the Navy in forecasting their limited water supply.

The Army Engineers are assisting with the cost of surveys on Meadow Valley Wash. Their interest stems from Congressional authorization for construction of two flood control dams on Pine and Mathews Canyons. Had they not come to the rescue these snow courses would have been abandoned due to a shortage of operating funds.

For the State as a whole the 1951–1952 snow season was probably

the heaviest ever encountered here by the white men. Every snow course in the State at one time contained more snow than ever before measured. Measurements in some areas have 42 years of record. At Donner Summit the total seasonal snowfall was greater than ever before in the 73 years of record. This resulted in record or near record stream flow from the east slope of the Sierra. Heavy snow on the Humboldt watershed resulted in record or near record discharge into Humboldt Sink. As is to be expected from such a heavy snow season, a greater than normal number of requests were received for additional information concerning snow cover and expected runoff. The City of Reno requested and received current snow information on the Truckee River watershed. The City of Ely requested and received weekly snow surveys in order to continually evaluate the flood potential on Robinson and Gleason Creek watersheds. The Las Vegas Land and Water Company requested and received data on the snow cover in the Spring Mountains and its effect on ground water in Las Vegas Artesian Basin. The Army Engineers requested and received current information on snow conditions and runoff prospects on the Humboldt watershed.

An over-snow machine has been obtained for permanent use in Nevada. It will operate in the Sierra for February and April surveys and in the south, central, and eastern areas of the State for the March surveys. There has long been a need for such a machine in the State as it is becoming more difficult each season to find competent personnel willing and able to make the arduous and hazardous snow survey trips. One additional over-snow machine is needed for operation out of Elko.

An expansion of the Lower Humboldt River snow course network is needed to supply information on expected runoff from streams such as Rock Creek which contributed so heavily to the lower river high-water conditions during the past spring.

CHAPTER IX

Irrigation Studies

By CLYDE E. HOUSTON, *Irrigation Engineer, Division of Irrigation Engineering, S.C.S., Research, Reno.*

Our work in the State is cooperative under formal agreement between the State Engineer, Agricultural Experiment Station, and Division of Irrigation Engineering, S.C.S. Research.

The last Biennial Report outlined the irrigation studies to be undertaken by our Division. These studies include work with evapotranspiration tanks, consumptive use and irrigation effieiency studies, irrigation evaluations, and water management practices.

The consumptive-use tanks are located at the Agricultural Experiment Station Farm on Valley Road in Reno. They consist of four 3' x 6' double tanks planted two to alfalfa and two to an alfalfa, fescue, brome-grass pasture mix. The growing season of 1950 was needed to establish the stands, and actual records of water use and yield were started during the 1951 season.

Soil moisture sampling and water measurements to determine seasonal consumptive use and irrigation efficiencies under field conditions were started at the Valley Road Farm in Reno, near Halleck and Lamoille in Elko County, and in Moapa Valley.

RENO AREA

At the Valley Road Farm a one-quarter acre alfalfa forage experimental plot was used. All water applied was measured with a 6-inch flume and continuous recorder. Surface runoff was measured with a 3-inch flume and recorder. Soil samples to six feet depth were obtained before and after each irrigation and oven dried to determine the actual amount of water placed in the root zone of the crop. At the end of the irrigation season a complete inventory was obtained of water placed on the land and into the soil, as well as that lost by deep percolation. Yields were also determined. A progress report on this project is now being prepared.

ELKO COUNTY

In Elko County, as in much of the rest of Nevada, most meadows producing hay and pasture are irrigated by a method of uncontrolled flooding. It is felt that this method of irrigation is wasteful from the standpoint of excess water use, as well as poor quality and yield of pasture and hay. Irrigation experiments on similar land have proven this in other States but there has been practically no research in Nevada aimed at determining the total value of improved water application methods on mountain meadows. Nevada's water supply is limited. With a limited water supply the best means for satisfying the ever increasing demands is by a more efficient use of existing supplies. What is efficient use? How much water is consumed in the production of hay and pasture? These questions are being constantly put to irrigation technicians throughout Nevada. In an attempt to

find an answer to some of these questions, irrigation experiments were started on a ranch near Halleck and another near Lamoille. One border, in an improved irrigation field, at Halleck, was chosen for which a complete water inventory was kept. The work was carried on in a manner similar to that at the Valley Road Farm. A two-foot rectangular weir with continuous recorder was set at the head of the border to measure all of the water applied. A one-foot weir with recorder was set at the bottom to measure the water leaving. The difference was the amount of water actually applied to the border at an irrigation. Soil samples were taken to a depth of four feet prior to irrigation and after irrigation. These were weighed and dried in accordance with standard procedures. Results of our study showed that on the field under observation there was sufficient water lost by deep percolation to irrigate an additional 25 acres. Last year's yield and hay values from the studied field were such that an additional 25 acres had a gross value of $64 per acre, or a total value of $1,600 per year. When it is realized that this in an infinitesimal part of the total irrigated area of the State, the returns from proper irrigation everywhere is astounding.

MOAPA VALLEY

In Moapa Valley, under present water management practices, there is a shortage of irrigation water during the summer peak use period. Here the supply is limited without expensive storage or importation of water. Here, too, more efficient use of existing supplies may go far toward alleviating the shortage. In an approach to better water management, studies have been undertaken to determine present use and efficiency of use. Practically the same type installation and procedures as previously described for Reno and Elko County have been set up in Moapa Valley.

COLUMBIA RIVER BASIN IN NEVADA

During the last session of the Nevada Legislature an Act was passed creating the Columbia River Basin Compact Commission of Nevada, with the State Engineer as chairman. The general purpose of this Commission is to represent Nevada in any dealings concerning the waters of Columbia River.

The Columbia River Basin covers an area of approximately 259,000 square miles of which about 5,000, or 2 percent, is within the borders of Nevada. The major tributaries in this State are the South and East Forks of Owyhee River, the Bruneau and Jarbidge Rivers, Salmon Falls Creek and Goose Creek. The elevation of the Nevada portion ranges from 5,000 to 10,000 feet with most of the irrigated areas in the 5,000 to 6,000 feet zone. Average annual precipitation ranges from about 5 to 25 inches with about 75 percent occurring in the form of snow. Informal estimates of Columbia Basin water leaving Nevada vary from one-quarter to three-quarters million acre-feet annually.

Mr. Shamberger, Nevada State Engineer, requested the assistance of the Soil Conservation Service in collecting preliminary data concerning: (1) irrigated acreage in Nevada, (2) irrigable acreage and, (3) amount of Columbia Basin water consumed in this State.

The State Engineer's office has been quite active in the Salmon Falls

Creek watershed, and during the past five years the S.C.S. has been actively cooperating with two Soil Conservation Districts which cover most of the area.

In July 1951, Mr. Shamberger, Mr. Naphan, S.C.S. Soil Scientist, and the writer spent a week in the Owyhee, Bruneau, and Jarbidge basins making a preliminary survey. Aerial photographs, S. C. S. survey maps, and the Northeastern Nevada Cooperative Land Use Study maps were used on the reconnaissance to delineate irrigated and irrigable lands. Crops, cropping practices, and irrigation methods were noted from observation and interview.

In general, irrigation begins with the melting of snow about April 1. In areas where late water is not available, water application ends about July 1. Where late water is available there may be irrigation until the first of November. Over most of the irrigated section, water is applied by diverting from a stream onto a field and allowing the water to flood the field for about two months when the stream either ceases to flow or must be removed so the field may dry out for haying.

Preliminary figures developed by Mr. Naphan give the following acreages of agricultural crops and native vegetation for irrigated and irrigable areas:

Irrigated and Irrigable Acreage—Columbia Basin in Nevada

Irrigated acres		Irrigable acres	
Alfalfa	1,140	Big sage	143,640
Improved hay and pasture	15,310	Rabbit brush	12,300
Native hay and pasture	46,250	Greasewood	5,120
Grain	1,710	Saltgrass meadows	4,400
		Willows	5,230
		Low sage	7,480
Total	64,410	Total	178,170

Consumptive-use data have been developed for these acreages by use of the Blaney-Criddle formula supplemented by interview of local interests.

The 135,000 acres of irrigable upland use only precipitation to maintain growth. If the uneconomic bottomland crops were replaced by improved hay and pastures, less water would be consumed than at present. If the bottomland and upland irrigable area were replaced by improved hay and pastures there would be an additional 140,000 acre-feet of irrigation water consumed.

A report to the State Engineer is being prepared which will contain all of these data and which will serve as a foundation upon which to build and revise as additional information becomes available from any source or may be developed expressly for this area. The idea, in general, is that when the time comes for the interested States to discuss the waters of the Columbia River and its tributaries, Nevada will have authoritative basic information upon which to justify her claims for beneficial use of Nevada water in Nevada.

CHAPTER X

New Laws Affecting Water

During the 1951 session of the State Legislature a number of amendments and additions were made to the General Water Law. No changes were made in the Ground-Water Act. This chapter will briefly describe the changes made in 1951. The State Engineer has compiled the water law containing all new additions and copies of such compiled laws are available upon request.

STATE ENGINEER, OFFICER OF COURT, MAY PETITION DISTRICT COURT FOR REVIEW OF ORDERS NOT COMPLIED WITH

Sec. 36½, Chap. 192, Stats. 1927 (as amended, Chap. 110, 1951)

Prior to the 1951 amendment, the State Engineer, or his assistant, acting as an officer of the court in distributing water, following the filing of the Order of Determination had no procedure whereby he could cite a water user before the court for not abiding by an order of the State Engineer other than by criminal contempt proceedings. The 1951 amendment provides that upon refusal of any claimant to abide by an order of the State Engineer, the State Engineer may petition the District Court for a review of such order and cause to be issued an order to show cause. Provision is also made that an appeal from the judgment may be taken to the Supreme Court.

ON STREAMS ADJUDICATED OTHER THAN PROVIDED IN SECTIONS 18 TO 51—STATE ENGINEER TO TAKE CHARGE OF DISTRIBUTION WHEN DISTRICT COURT DIRECTS

Sec. 46½, Chap. 1947 (as amended, Chap. 121, 1951)

This section provides that on streams adjudicated other than by the procedure set forth in sections 18 to 51 of the water law, when one or more users having a decreed right desire to have the State Engineer take charge of the diversions and distributions, they may petition the District Court which entered such decree. The 1951 amendments provide that the District Court shall direct that notice of the filing of the petition shall be given to each water user or claimant and that such notice be an order to show cause. That the petition shall be deemed in nature of a complaint, and that appeals may be taken from the judgment of the District Court to the Supreme Court.

The Supreme Court of Nevada, in an opinion entered June 27, 1952, found this section constitutional.

WATER COMMISSIONERS

Sec. 52, Chap. 209, Stats. 1931 (as amended, Chap. 110, 1951)

Amendments were made to provide that the duties and salaries of the water commissioners shall be fixed by the State Engineer, together with other amendments concerning the collection and distribution of funds to pay for commissioner services, and that the State Engineer may appoint an engineer to work in a supervisory capacity on water distribution problems.

INGRESS AND EGRESS—WATER COMMISSIONERS

Sec. 54, Chap. 176, Stats. 1929 (as amended, Chap. 110, 1951)

This section was amended to provide that water commissioners shall have the right to ingress and egress across and upon public, private, or corporate lands at all times in the exercise of his duties.

STATE ENGINEER AUTHORIZED TO REMOVE DAMS NOT LEGALLY ESTABLISHED

Sec. 56½, Chap. 110, Stats. 1951

This is a new section and empowers the State Engineer to order the removal of any dam, diversion works or obstruction that has been placed in any stream channel when such dam, diversion works or obstruction has not been legally established.

APPROPRIATION OF WATER—WHO MAY APPROPRIATE

Sec. 59, Chap. 59, Stats. 1919 (as amended, Chap. 110, 1951)

This section was amended to define who is eligible to appropriate water by inserting the words "or any person, as defined in section 48 of this act." Section 48 defines "person" as used in the Act as a corporation, an association, the United States, the State, as well as a natural person.

RETURN OF FEES ON CANCELLED APPLICATIONS

Sec. 61, Chap. 140, Stats. 1913 (as amended, Chap. 110, 1951)

During the 1949 Legislature the fee for an application to appropriate water was raised from $20 to $25. The publication fee, which is included in the application fee, was increased from $12.50 to $15. The 1949 Legislature failed to amend section 61 to provide a refund of $15 instead of the $12.50 to the applicant upon the cancellation of his application. The 1951 amendment so provides.

HEARING ON PROTESTS—TECHNICAL RULES OF EVIDENCE NOT TO APPLY

Sec. 62, Chap. 140, Stats. 1913 (as amended, Chap. 110, 1951)

The amendment provides "that technical rules of evidence shall not be deemed to apply" in a hearing conducted by the State Engineer in the matter of a protested application.

APPLICATION FOR EXTENSION OF TIME

Secs. 65 and 67, Chap. 140, Stats. 1913 (as amended, Chap. 110, 1951)

The amendment provides that when a permittee desires to make an application for extension of time within which to file proofs of commencement, completion and beneficial use, such application for extension of time must be filed within 30 days following notice by registered mail that proof of such work is due.

MAP TO ACCOMPANY PROOF OF BENEFICIAL USE

Sec. 69, Chap. 140, Stats. 1913 (as amended, Chap. 110, 1951)

This section as amended, gives the State Engineer discretionary power to require that the proof of beneficial use be accompanied by a map. Further, that the State Engineer may in his discretion grant

an extension of time within which to file proof of beneficial use and map, provided that application for such extension be made prior to the expiration of the 30-day period following notice of registered mail.

ACTION INITIATED IN COURT THAT ENTERED DECREE

Sec. 75, Chap. 253, Stats. 1915 (as amended, Chap. 110, 1951)

Section 75 provides for a review by a District Court of orders or decisions of the State Engineer. The 1951 amendment provides that on a stream system where a Decree of Court has been entered, the action shall be initiated in the court that entered the decree.

SUPERVISION OF DAMS

Sec. 77¼, Chap. 110, Stats. 1951

This is a new section which provides that before constructing a dam more than 10 feet in height, or if less than 10 feet in height and will impound more than 10 acre-feet of water, plans and specifications must be filed in triplicate 30 days before construction, and must be approved by the State Engineer. The section provides for certain supervision of dams. Chapter VI sets forth the Act and the State Engineer's Rules and Regulations pertaining thereto.

COLUMBIA BASIN INTERSTATE COMPACT COMMISSION OF THE STATE OF NEVADA

Chap. 218, Stats. 1951

This is a new section creating the Columbia Basin Interstate Compact Commission of the State of Nevada.

INTERSTATE WATERS

Chap. 325, Stats. of 1951

It is declared to be contrary to the economic welfare and against the public policy of the State of Nevada to change the place of use or transfer, or to permit a change of the place of use or transfer of water or water rights for use beyond the borders of the State of Nevada, as to water heretofore or hereafter appropriated and beneficially used in the State of Nevada, and no permit or authorization shall be issued or given for such change of use or transfer.

CHAPTER XI

Water Litigation

DUTT CREEK—EUREKA COUNTY

On January 28, 1949 the Supreme Court of the State of Nevada ruled in Case No. 3533, that the existing Nevada Water Laws did not preclude a person from acquiring an adverse right to the use of water. The opinion of the court was divided, with Judge Eather dissenting. On this one point the Third Judicial District Court was overruled and the case referred back to the court.

An amended complaint was filed by the plaintiff, Dewey Dan, and answers were made by defendants, Dan Filippini and Alfred Merritt Smith, State Engineer. The matter has not yet come to trial.

NOTE: The 1949 Legislature amended the water law in a manner to prevent any further adverse claims to the use of water.

LITTLE HUMBOLDT RIVER

On February 15, 1951 four actions were filed in the Sixth Judicial District Court by the Henry McCleary Timber Company, as plaintiff, vs. Alfred Merritt Smith, State Engineer, and the Wm. Stock Farming Co. and others as defendants. These actions are an appeal from the ruling of the State Engineer denying four applications to appropriate the waters of certain streams which are part of the Little Humboldt River stream system. The actions have not come to trial.

On March 19, 1951 an action was filed in the Sixth Judicial District Court by the Henry McCleary Timber Company, as plaintiff, vs. Alfred Merritt Smith, State Engineer, as defendant. This action is an appeal from an order of the State Engineer setting the irrigation season on the Little Humboldt River stream system. The William Stock Farming Company, et al., and the Bullhead Cattle Company have been allowed to intervene in the case on the side of the State Engineer.

The matter has not yet come to trial.

HUMBOLDT RIVER

On December 23, 1949 the Horseshoe Cattle Company, as plaintiff, filed an action against Alfred Merritt Smith, State Engineer as defendant, in the Third Judicial District Court. This action was an appeal from an order of the State Engineer demanding the removal of a dam from the present Humboldt River channel and cessation of the use of a ditch from Rock Creek. Since the filing of the complaint, several meetings have been held and engineering plans have been prepared and discussd with the several interested parties in the hopes that an out-of-court agreement may be reached.

QUINN RIVER

Numerous actions have been filed concerning water use on the Quinn River system. No attempt will be made to list each action. However, two decisions by the Supreme Court dealing with these actions should be noted.

In a "Contempt of Court" action which was taken to the Supreme Court, the Supreme Court on May 15, 1950 held that a District Judge could not sit on contempt actions in his Judicial District where such action was a contempt proceeding dealing with a decree entered by such court.

The 1951 Legislature amended the existing statute to the extent that the District Judge could hear these actions after the decree had been entered for 10 years.

On June 25, 1951 an action was started under section 46½ of the water law, being Chapter 121, Statutes of 1951. The constitutionality of this Act was questioned and the matter went before the Supreme Court. On June 27, 1952 the Supreme Court denied a writ of prohibition and held that section 46½, Chapter 121, Statutes of 1951, was constitutional.

APPENDIX I

State Water Right Surveyors of Nevada

Following is an active list of licensed State Water Right Surveyors authorized to practice before the Office of the State Engineer during the past biennium:

NEVADA

Babbitt—Floyd L. Justus.
Battle Mountain—James R. Wilson.
Beatty—Ernest H. Clary.
Carson City—John B. Chattin.
Wm. J. Johnstone.
Harry E. MacNelly.
Jack A. Parvin.
Robert A. Allen.
W. T. Holcomb.
Lawrence G. Chambers.
Elko—W. H. Settlemeyer.
Hugh I. Rossolo.
Ely—F. W. Millard.
Robert W. Millard.
John Victor Caselli.
Eureka—Floyd Sadler.
M. M. Harcourt.
Fallon—Hugh M. Wilson.
Riley C. Hilbel.
Fernley—W. A. Pray.
Gardnerville—O. L. Huseman.
Goldfield—Harry R. Hughes.
Henderson—F. W. Thorne.
Frank J. Gould.
Las Vegas—Jack Asher.
Harlan Brown.
C. D. Baker.
Van O. Eastland.
Frank D. Rathbun, Jr.
George W. Von Tobel.
L. A. Harris.
F. M. Eaton.
Lovelock—Robert S. Leighton.
Mina—L. R. Spencer.
Minden—J. A. Millar.
James D. Wallace.
Paradise Valley—F. R. Stewart.
Ploche—Frank Walker.
Reno—R. W. Prince.
John E. Curran.
C. V. Taylor.
Claude E. Hunter.
John V. Mueller.
Starr McW. Hill, Jr.
Carl Stoddard.
Philip S. Cowgill.
David Mitchell.
Geo. W. Malone.
C. C. Taylor.
E. P. Osgood.
A. E. Holgate.
Wayne McLeod.
William A. Relnken.
Round Mountain—Thomas M. Cahill.
Sparks—Robert F. Guinn.
Sulphur—J. G. Huntington.
Stewart—C. J. Preece.
Tonopah—C. A. Liddell.
Virginia City—Walter G. Reid.
Howard W. Squires.
Wells—J. L. Vandiver.
Winnemucca—W. A. Wentz.
A. V. Tallman.
Richard M. Black.

CALIFORNIA

Alturas—W. J. Archer, P. O. Box 167.
Robert W. Haselwood.
San Francisco—Gunnar F. Halle, 219 Gonzales Drive.

OREGON

Portland—George L. Ducret, % Fish and Wildlife Service, Swan Island.

UTAH

Ogden—Louis H. Bunkel, % Southern Pacific Co.
R. Russell Lyon.
K. W. Kennedy, 1544 Twenty-seventh Street.
Salt Lake City—C. R. Hagen, 218 Felt Bldg.
St. George—Leo A. Snow, Snow Bldg.

APPENDIX 2

Irrigation Districts and Companies

IRRIGATION COMPANIES

Muddy River Irrigation Company, Preston Irrigation Company, Lund Irrigation Company, Bunkerville Irrigation Company, Mesquite Irrigation Company, Alamo Irrigation Company, Panaca Irrigation Company, Pacific Reclamation Company, Franktown Irrigation Company, Ash Springs Irrigation Company, and Hiko Irrigation and Water Company.

LUND IRRIGATION COMPANY

Officers—A. N. Carter, President; Geo. W. Faucett, Vice-President; Leland Hendrix, Secretary-Treasurer; Milton D. Gardner and Vance McKenzie, Members.
Office—Lund, Nevada.
Organized 1907.

MESQUITE IRRIGATION COMPANY

Officers—Vernon Frehner, President; Dee M. Hughes, Vice-President; John Houston, Director; Vernon Pollock, Secretary.
Office—Mesquite, Nevada.
Organized June 8, 1925.
Irrigable acres, 2,200.
Irrigated acres, 1,600.

BUNKERVILLE IRRIGATION COMPANY

Officers—William Leavitt, President; Wendell Leavitt, Secretary-Treasurer; Dan Waite and Luther Hafen, Directors.
Office—Bunkerville, Nevada.
Organized June 25, 1925.
Irrigable acres, 1,200.
Irrigated acres, 985.

PANACA IRRIGATION COMPANY

Officers—Jas. A. Wadsworth, President; Bert Findlay, Vice-President; Wm. Adair, Secretary-Treasurer; Henry Johnson and Ernest T. Gentry, Directors.
Office—Panaca, Nevada.

PRESTON IRRIGATION COMPANY

Officers—Randall Bradley, President; Wesley Reid, Vice-President; Charles Funk, Secretary; Lowell Petersen and Clifford Peacock, Directors.
Office—Preston, Nevada.
Organized March 24, 1911.

MUDDY VALLEY IRRIGATION COMPANY

Officers—Edwin G. Wells, President; Roy Robison, Vice-President; Louis Adams, Karl Marshall, and Lester Shurtliff, Directors; Joseph N. Skousen, Secretary-Treasurer.
Office—Overton, Nevada.
Irrigable acres, 4,500.
Irrigated acres, 3,000.

ALAMO IRRIGATION COMPANY

Officers—John P. Wright, President; Lowell Ercanbrack, Vice-President; Dan Stewart, Secretary-Treasurer; Joseph W. Steele and Harvey Frehner, Directors.
Office—Alamo, Nevada.
Organized 1922.
Irrigable acres, 822.
Irrigated acres, 725.

PACIFIC RECLAMATION COMPANY

Officers—Ensign Hill, President and Resident Agent; Wayne Bake, Director; L. A. Bohne, Director and Secretary-Treasurer.
Office—Wells, Nevada.

ASH SPRINGS IRRIGATION COMPANY

Officers—Leonard Wadsworth, President; Edwin Higbee, Vice-President; Gardner Chism, Secretary-Treasurer; Ray Stewart and Milt Steele, Directors.
Office—Alamo, Nevada.
Organized 1947.
Irrigable acres, 840.
Irrigated acres, 840.

HIKO IRRIGATION AND WATER COMPANY

Officers—George E. Nesbitt, President; A. Roy Nesbitt, Vice-President; Wm. U. Schofield, Jr., Secretary-Treasurer; Keith Whipple, Director; J. Alfred Hansen, Director and Resident Agent.
Office—Hiko, Nevada.
Organized October 21, 1948.
Irrigable acres, 900.
Irrigated acres, 600.

IRRIGATION DISTRICTS

Walker River Irrigation District, Pershing County Conservation District, Truckee-Carson Irrigation District, and Washoe County Water Conservation District.

WALKER RIVER IRRIGATION DISTRICT

Officers—B. E. Minister, President and Director; Manuel Farias, Vice-President and Director; Richard B. Day, Treasurer and Director; Ugo Giorgi and A. Menearini, Directors; Roy M. Whitacre, Secretary-Manager; and Claire Thompson, Assistant Secretary.
Office—Courthouse, Yerington, Nevada.
Organized November 25, 1918.
Irrigable acres, 160,000.
Irrigated acres, 79,175.

PERSHING COUNTY CONSERVATION DISTRICT

Officers—Ruth C. Ruddell, President; Ed. Garaventa, Vice-President; Henry Anderson, Treasurer; Robert S. Leighton, Secretary-Manager; Lester C. Munk, Myrtle B. Anker, Lester Hansen, Frank Quilici, and Joe F. Mateas, Directors.
Office—Courthouse, Lovelock, Nevada.
Organized February 1926.
Irrigable acres, 36,000.
Irrigated acres, 25,438.

WASHOE COUNTY WATER CONSERVATION DISTRICT

Officers—Edward M. Peckham, President; Robert J. Flick, Vice-President; Ernest A. Capurro, Treasurer; E. S. Yoakam, Secretary; Ernest J. Kleppe, Carl Stoddard, and Charles J. Gault, Directors; John Robinson, Attorney; Chester C. Taylor, Engineer-Manager.

Office—29 East First Street, Reno, Nevada.

Organized June 1929.

FRANKTOWN IRRIGATION DISTRICT

Officers—A. H. Cliff, President; John L. Jackson, Secretary; R. F. I. Raymond, Director and Vice-President; James H. Lathrop, George Leonard, Jack Whitehead, and Fred L. Cliff, Directors.

Office—First National Bank Building, Reno, Nevada.

Organized 1947.

Irrigable acres, 2,719.

Irrigated acres, 2,100.

TRUCKEE-CARSON IRRIGATION DISTRICT

Officers—John Konda, President; George G. Miller, Marvin Weishaupt, Jack Olson, Mario Peraldo, Fred Kirn, and John C. Thornton, Directors; J. W. Johnson, Jr., Attorney; John R. Hannifan, Secretary-Treasurer; Phil Hiibel, Project Manager.

Office—Fallon, Nevada.

Organized November 25, 1918.

Irrigable acres, 72,354.

Irrigated acres, 55,000.

Additional pasture lands irrigated, 33,000.

APPENDIX 3

Status of Applications Filed During the Period from July 1, 1950, to June 30, 1952

Following is a condensed statement giving the salient data in connection with applications filed during the period from July 1, 1950, to June 30, 1952, in the order of:

1. Application serial number.
2. Date of filing.
3. Name of applicant.
4. Source of water supply.
5. Purpose of appropriation.
6. Action on application.
7. Status of permits as of June 30, 1952.

NOTE—G. S. denotes Good Standing.

13432 7- 3-50 George D. Brown; Underground; Irrigation and domestic; Approved January 31, 1951, for 1.5 c.f.s. G. S.

13433 7- 3-50 Raymond Gardner; Minnow Spring Well; Stockwatering; Approved October 5, 1951, for 0.025 c.f.s. G. S.

13434 7- 3-50 H. J. Buchanan; Corral Canyon Creek; Irrigation; Approved December 6, 1950, for 3.0 c.f.s. G. S.

13435 7- 3-50 H. J. Buchanan; Underground; Irrigation and domestic; Approved December 6, 1950, for 1.9 c.f.s. G. S.

13436 7- 3-50 Las Vegas Hotel, Inc; Underground; Quasi-municipal; Approved February 1, 1951, for 0.6 c.f.s. G. S.

13437 7- 3-50 Las Vegas Hotel, Inc; Underground; Quasi-municipal; Approved February 1, 1951, for 0.4 c.f.s. G. S.

13438 7- 3-50 G. M. Reid; Underground; Stockwatering and domestic; Approved December 6, 1950, for 0.015 c.f.s. G. S.

13439 7- 3-50 John C. Pugh; Verdi Spring; Domestic; Cancelled February 5, 1951, because of failure to refile corrected application within statutory time.

13440 7- 4-50 John Jay Casey; Underground; Irrigation and domestic; Approved April 23, 1951, for 4.0 c.f.s. G. S.

13441 7- 7-50 Harold P. Stewart; Underground; Irrigation and domestic; Approved February 1, 1951, for 4.5 c.f.s. G. S.

13442 7- 7-50 Harold P. Stewart; Underground; Irrigation and domestic; Approved February 1, 1951, for 5.0 c.f.s. G. S.

13443 7-10-50 Edward Delbert Hyde; Underground; Irrigation and domestic; Cancelled August 27, 1951, because of failure of applicant to comply with the provisions of permit.

13444 7-11-50 John Greenfield; Underground; Irrigation and domestic; Approved December 13, 1950, for 0.35 c.f.s. G. S.

13445 7-11-50 Mary B. Kessler; Underground; Domestic; Approved April 12, 1951, for 0.05 c.f.s. Certificate issued.

13446 7-11-50 W. L. Petersen; Underground; Irrigation and domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

13447 7-17-50 Muller Bros.; Irrigation and domestic; Cancelled June 14, 1951, because of failure to submit supporting map within the statutory time.

13448 7-17-50 Rex B. Clark; Underground; Stockwatering; Approved February 14, 1951, for 0.016 c.f.s. Certificate issued.

13449 7-21-50 Will M. and Hatherly B. Bliss, Will M. Bliss, as trustee for William W. and Hatherly Bliss; Hen Highway or Badger Springs; Irrigation and domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

13450 7-25-50 H. H. Magee; Underground; Irrigation; Approved January 2, 1951, for 5.0 c.f.s. G. S.

13451 7-25-50 H. H. Magee; Underground; Irrigation; Approved January 2, 1951, for 2.0 c.f.s. G. S.

13452 7-26-50 Robert T. and Lillian R. Gardner; Underground; Irrigation and domestic; Approved December 6, 1950, for 0.2 c.f.s. G. S.

13453 7-26-50 Bonnye V. Hooper; Cradlebough Spring; Stockwatering; Cancelled September 11, 1951, because of failure of applicant to comply with the provisions of permit.

13454 7-26-50 Bonnye V. Hooper; Strawberry No. 2 Spring; Stockwatering; Protested.

12455 7-26-50 Bonnye V. Hooper; Smith No. 1 Spring; Stockwatering; Cancelled September 11, 1951, because of failure of applicant to comply with the provisions of permit.

12456 7-27-50 R. B. Griffith; Kyle Spring; Domestic; Approved December 4, 1950, for 0.40 c.f.s. G. S.

12457 7-31-50 Phillip E. Rowe; North Gardner Creek; Irrigation; Approved March 1, 1951, for 5.0 c.f.s. G. S.

12458 8- 7-50 C. B. Quinlisk & Co.; Underground; Mining, milling and domestic; Approved July 19, 1951, for 0.75 c.f.s. G. S.

12459 8- 7-50 Verne B. and Ralph G. Parman; Flowing Springs (Flood Water); Irrigation and domestic; No action.

12460 8- 9-50 Sidney B. Smyth; Underground; Irrigation and domestic; No action.

12461 8-14-50 Knud Nielsen; Rock Creek; Irrigation and domestic; Approved February 5, 1952, for 1.5 c.f.s. G. S.

12462 8-17-50 Gertrude G. Moran; Underground; Irrigation and domestic; Cancelled December 14, 1951, because of failure of applicant to comply with the provisions of permit.

12463 8-17-50 William L. Meikle; Nellis Air Force Base Disposal Plant Effluent; Irrigation; Approved April 12, 1951, for 7.0 c.f.s. G. S.

12464 8-21-50 A. A. Rose; Underground; Refrigeration; Approved December 13, 1950, for 0.10 c.f.s. G. S.

12465 8-22-50 Las Vegas Hotel, Inc.; Underground; Quasi-municipal; Approved July 19, 1951, for 0.8 c.f.s. G. S.

12466 8-22-50 John Isbell; Unnamed Drain Ditch; Irrigation and domestic; Approved January 2, 1951, for 0.15 c.f.s. G. S.

12467 8-23-50 John J. Casey; Antelope Spring; Stockwatering; Protested; No action.

12468 8-25-50 John J. Casey; Sulphide Well; Stockwatering; Protested; No action.

12469 8-28-50 The Johnson Ranch; Underground; Stockwatering; Approved January 2, 1951, for 0.02125 c.f.s. G. S.

12470 8-28-50 The Johnson Ranch; Underground; Stockwatering and domestic; Approved January 2, 1951, for 0.05125 c.f.s. G. S.

12471 8-28-50 The Johnson Ranch; Underground; Stockwatering; Approved January 2, 1951, for 0.03125 c.f.s. G. S.

12472 8-28-50 Truckee-Carson Irrigation District; Rice Drains; Irrigation and Marsh Pasture; Approved March 1, 1951, for 25 c.f.s. G. S.

12473 8-28-50 Truckee-Carson Irrigation District; "L" Drain; Irrigation and Marsh Pasture; Approved March 1, 1951, for 50 c.f.s. G. S.

12474 8-28-50 Truckee-Carson Irrigation District; Carson Lake Drain; Irrigation and Marsh Pasture; Approved March 1, 1951, for 50 c.f.s. G. S.

12475 8-28-50 Las Vegas Thoroughbred Assn.; Underground; Race track operation; Application to change; Cancelled October 22, 1951, because of failure of applicant to comply with the provisions of the permit.

12476 8-28-50 Diamond Ltd. Corporation; Underground; Quasi-municipal; Denied August 14, 1951.

12477 8-29-50 Harry C. Foster; Underground; Irrigation and domestic; Approved March 14, 1951, for 0.05 c.f.s. G. S.

12478 9- 7-50 Lafayette Carter; Underground; Irrigation; Approved August 14, 1951, for 3.0 c.f.s. G. S.

12479 9- 7-50 Lafayette Carter; White River Slough; Irrigation; Protested; No action.

12480 9- 7-50 Nevada State Prison; Clear Creek; Irrigation, Stockwatering and domestic; Application to change withdrawn by applicant November 21, 1951.

12481 9-11-50 Bartholomae Corporation; Underground; Stockwatering; Protested; Application to change; No action.

12482 9-11-50 Bartholomae Corporation; Underground; Stockwatering; Protested; Application to change; Approved January 10, 1952, for 0.0275 c.f.s. G. S.

12483 9-11-50 Bartholomae Corporation; Hoover Spring; Stockwatering; Protested; Application to change; No action.

12484 9-11-50 Bartholomae Corporation; Rock Spring; Stockwatering; Protested; Application to change; No action.

12485 9-11-50 Bartholomae Corporation; Upper Davis Spring; Stockwatering and domestic; Protested; Application to change; Approved January 10, 1952, for 0.0154 c.f.s. G. S.

12486 9-11-50 Bartholomae Corporation; Lower Davis Spring; Stockwatering and domestic; Protested; Application to change; Approved January 10, 1952, for 0.0154 c.f.s. G. S.

12487 9-11-50 Bartholomae Corporation; Kinkead Spring; Stockwatering and domestic; Protested; Application to change; Approved January 10, 1952, for 0.0154 c.f.s.

12488 9-11-50 Bartholomae Corporation; Number Four Spring; Stockwatering; Protested; Application to change; Approved January 10, 1952, for 0.006 c.f.s.

12489 9-11-50 Bartholomae Corporation; Mayhe Well; Stockwatering; Protested; Application to change; No action.

12490 9-11-50 Bartholomae Corporation; Big Pump Well; Stockwatering; Protested; Application to change; No action.

13491 9-13-50 B. R. Robison; Chin Creek; Irrigation; Approved October 24, 1951, for 2.0 c.f.s. G. S.

13492 9-13-50 Anna D. Schindler; Underground; Irrigation and domestic; Approved September 5, 1951, for 0.05 c.f.s. G. S.

13493 9-15-50 Nevada National Forest (U. S. Forest Service); Twin Falls Spring; Domestic; Approved March 14, 1951, for 0.10 c.f.s. G. S.

13494 9-15-50 H. E. Rountree; Underground; Irrigation and domestic; Application to change; Approved January 2, 1951, for 2.2 c.f.s. G. S.

13495 9-18-50 City of Las Vegas; Sewage disposal and storm drainage water; Irrigation; Withdrawn by applicant August 13, 1951.

13496 9-18-50 Addison Brown; Underground; Milling and domestic; Protested; No action.

13497 9-20-50 B. D. and Aileen Lee Davis; Underground; Irrigation and domestic; Approved January 31, 1951, for 0.5 c.f.s. G. S.

13498 9-21-50 Fallini Bros.; Underground; Stockwatering; Protested; Application to change; Approved February 14, 1951, for 0.032 c.f.s. Certificate issued.

13499 9-21-50 Fallini Bros.; Underground; Stockwatering; Protested; Application to change; Approved February 14, 1951, for 0.002 c.f.s. Certificate issued.

13500 9-21-50 Fallini Bros.; Bucks Well; Stockwatering; Protested; Application to change; Approved February 14, 1951, for 0.032 c.f.s. Certificate issued.

13501 9-21-50 Fallini Bros.; Pyramid Spring; Stockwatering; Protested; Application to change; Approved February 14, 1951, for 0.032 c.f.s. Certificate issued.

13502 9-21-50 Fallini Bros.; Cedar and Sumner Springs; Stockwatering; Withdrawn by applicant December 12, 1950.

13503 9-25-50 Joe Urquiza; Underground; Irrigation; Approved February 16, 1951, for 1.5 c.f.s. G. S.

13504 9-27-50 Verne H. and Ralph G. Parman; Underground; Irrigation and domestic; Approved January 31, 1951, for 5.0 c.f.s. G. S.

13505 9-28-50 Rex B. Clark; Roadside Spring; Stockwatering; Approved March 2, 1951, for 0.0342 c.f.s. G. S.

13506 9-28-50 A. J. and Leota Van Fleet; West Walker River; Irrigation and domestic; Application to change; Approved March 27, 1951, for 1.84 c.f.s. G. S.

13507 10- 2-50 Earl D. Crinito; Underground; Quasi-municipal and domestic; Approved February 1, 1951, for 0.1 c.f.s. G. S.

13508 10- 4-50 William L. Meikle; Underground; Irrigation and domestic; Approved March 2, 1951, for 4.0 c.f.s. G. S.

13509 10- 4-50 William L. Meikle; Underground; Irrigation and domestic; Approved March 2, 1951, for 2.0 c.f.s. G. S.

14378 6-30-52 Ugo Giorgi and Sons; Underground; Domestic; No action.
14379 6-30-52 Ugo Giorgi and Sons; Underground; Domestic; No action.
14380 6-30-52 Leland Hendrix; Underground; Irrigation; No action.
14381 6-30-52 Albert Gubler; Underground; Irrigation; No action.

APPENDIX 4

Status of Applications Filed Prior to July 1, 1950

Following is a condensed statement giving the salient data in connection with applications filed prior to July 1, 1950, upon which action has been taken during the present biennium, in the order of:

1. Application serial number.
2. Date of filing.
3. Name of applicant.
4. Source of water supply.
5. Purpose of appropriation.
6. Status on applications.
7. Status of permits as of June 30, 1952.

5190 5-18-19 True Vencill; Old River Branch of Carson River; Irrigation and domestic; Denied October 30, 1950.

5191 5-18-19 True Vencill; Old River Branch of Carson River; Irrigation and domestic; Denied October 30, 1950.

5192 5-18-19 R. L. Douglas; Old River (Carson Branch); Irrigation and domestic; Denied December 29, 1950.

5196 5-12-19 George H. Mitchell; Old River Branch of Carson River; Irrigation; Denied December 29, 1950.

5202 5-16-19 Charles E. Kent; Old River Branch of Carson River; Irrigation, stockwatering and domestic; Denied December 29, 1950.

5206 5-21-19 Charles E. Kent; Dutch Hill Lake; Irrigation, stockwatering and domestic; Denied December 29, 1950.

5227 6- 4-19 R. L. Douglass; South Fork Carson River; Irrigation; Denied December 29, 1950.

5616 7-14-19 C. M. Hoover; Old River Branch of Carson River; Irrigation and stockwatering; Denied December 29, 1950.

5617 7-14-19 E. B. Cornell; Old River Branch of Carson River; Irrigation; Denied December 29, 1950.

6273 9-29-20 W. H. Russell; Unnamed Spring; Irrigation and domestic; Denied September 20, 1950.

6414 3- 4-21 Austin J. Nugent; Underground; Irrigation and domestic; Cancelled December 11, 1950, because of failure of applicant to comply with the provisions of permit.

6583 11- 3-21 Walker River Irrigation Co.; Unnamed Stream; Irrigation and domestic; Approved February 15, 1952. G. S.

6671 3-12-22 H. W. Griffith; Fletcher Spring; Irrigation, stockwatering and domestic; Cancelled October 17, 1950, because of failure of applicant to comply with the provisions of permit.

7581 11-27-25 Potts Bros.; Willow Spring; Stockwatering; Withdrawn by applicant September 11, 1951.

7582 11-27-25 Potts Bros.; Willow Spring; Stockwatering; Withdrawn by applicant September 11, 1951.

7583 11-27-25 Potts Bros.; Road Canyon Spring; Stockwatering; Withdrawn by applicant September 11, 1951.

7684 4- 5-26 W. H. Getchell; Rock Creek; Irrigation; Withdrawn by applicant October 25, 1951.

7795 6-30-26 H. P. Carville; Snowball Spring; Stockwatering and domestic; Approved January 31, 1951. G. S.

7796 6-30-26 H. P. Carville; Snowball Spring; Stockwatering and domestic; Approved January 31, 1951. G. S.

7797 6-30-26 H. P. Carville; Snowball Spring; Stockwatering and domestic; Approved January 31, 1951. G. S.

7798 6-30-26 H. P. Carville; Snowball Spring; Stockwatering and domestic; Approved January 31, 1951. G. S.

8051 5-12-27 Joe Cazier and John Manzonie; Albert Spring; Stockwatering; Denied December 29, 1950.

8250 2- 7-27 Charles W. Straight; Stillwater Slough; Irrigation; Denied December 29, 1950.

8482 2- 1-28 H. W. Griffith; Kyle Spring; Irrigation and domestic; Cancelled October 17, 1950, because of failure of applicant to comply with the provisions of permit.

8741 11- 7-28 Segura Bros.; Underground; Stockwatering and domestic; Approved January 29, 1952. G. S.

8919 2-23-29 W. T. Jenkins Co.; Red Rock Spring; Stockwatering and domestic; Approved February 8, 1952. G. S.

8937 6-12-29 W. T. Jenkins Co.; Harry Canyon; Stockwatering; Approved February 8, 1952. G. S.

8938 6-12-29 W. T. Jenkins Co.; Harry Canyon; Stockwatering; Approved February 8, 1952. G. S.

9190 12-23-29 J. B. Sorhouet; Underground; Stockwatering and domestic; Approved November 1, 1950. G. S.

9279 11-22-30 J. B. Sorhouet; Moore's Station Creek and tributaries; Irrigation and domestic; Approved November 1, 1950. G. S.

9281 11-22-30 J. B. Sorhouet; Needle Spring No. 1; Stockwatering and domestic; Approved November 1, 1950. G. S.

9735 8- 4-34 Michael Knopf; Cottonwood Creek and tributaries; Irrigation and domestic; Cancelled March 12, 1952, because of failure of applicant to comply with the provisions of permit.

10089 3-11-37 John A. Houlahan; Brickyard Spring; Mining and milling; Withdrawn by applicant June 28, 1951.

10142 7-26-37 C. H. Jones; Unnamed Spring; Mining, milling and domestic; Withdrawn by applicant June 28, 1951.

10204 10-24-38 Albert E. Woods; Rocky Spring; Stockwatering; Denied July 23, 1951.

10245 3-11-39 Mrs. Effie M. Fisk; No name Springs; Mining and domestic; Denied August 14, 1951.

10259 6-19-39 Charles H. Griffith; Underground; Mining, milling and domestic; Cancelled November 16, 1951, because of failure of applicant to comply with the provisions of permit.

10286 6-21-39 George Leonard, Trustee; Franktown Creek and tributaries; Irrigation and domestic; Denied February 14, 1951.

10287 6-23-39 Gray Eagle Mining Co.; Underground; Mining, milling and domestic; Denied August 16, 1951.

10414 8-28-39 Earnest L. Quist; Meadow Valley Wash; Mining, milling and domestic; Cancelled November 9, 1950, because of failure of applicant to comply with the provisions of permit.

10437 11- 6-39 H. A. Yelland; Nigger Creek; Irrigation; Denied July 21, 1950.

10451 12- 7-39 John Crosby, Jr.; Unnamed Spring; Mining, milling and domestic; Withdrawn by applicant July 27, 1950.

10487 4- 8-40 J. M. Collins; Nigger Creek and tributaries; Irrigation and domestic; Approved August 29, 1951. G. S.

10529 7-10-40 C. E. Townsend; Monte Cristo Spring; Mining, milling and domestic; Withdrawn by applicant July 16, 1951.

10540 7-19-40 Bruneau Gold, Inc.; Unnamed Spring; Domestic; Denied May 29, 1951.

10551 11- 6-40 Frederick Steigmeyer; Underground; Mining and domestic; Denied July 23, 1951.

10598 11-26-40 Lois Kellogg II; Underground; Irrigation and domestic; Withdrawn by applicant September 13, 1951.

10607 1- 2-41 Fred S. Talcott; Flood Waters; Irrigation and domestic; Cancelled May 10, 1951, because of failure of applicant to comply with the provisions of permit.

10613 1-27-41 John H. Conaway; Underground; Irrigation; Withdrawn by applicant December 8, 1950.

10634 3-12-41 Arthur S. Nichols; Woodman Spring; Mining, milling and domestic; Withdrawn by applicant August 23, 1951.

10672 5-26-41 Fort Pierre, Inc.; San Jose Tunnel; Mining, milling and domestic; Denied August 1, 1950.

10705 7-21-41 Caliente Public Utilities; Clover Wash; Municipal; Withdrawn by applicant June 18, 1951.

10724 9- 6-41 Joe Gruden; Snake Creek; Power and domestic; Denied July 23, 1951.

10725 10- 4-41 Joe Gruden; Snake Creek; Mining, milling and domestic; Denied July 23, 1951.

10744 10-14-41 International Smelting & Refining Co.; Underground; Domestic; Withdrawn by applicant October 25, 1950.

10748 10-23-41 J. H. Manson; Unnamed Spring; Mining, milling and domestic; Cancelled January 9, 1951, because of failure of applicant to comply with the provisions of permit.

10756 11-12-41 Russell Campbell; Lime Kiln Canyon; Mining, milling and domestic; Denied July 23, 1951.

10768 12-21-41 William Clark and C. H. Henderson; Waste Water; Irrigation; Denied October 30, 1950.

10801 4- 1-42 H. T. Rodgers; Big Meadow Slough; Irrigation; Approved October 22, 1950. G. S.

10833 6- 9-42 Frederick Steigmeyer; Shoshone Creek; Mining; Denied July 23, 1951.

10842 6-26-42 H. T. Rogers; Reservoir Spring; Irrigation and domestic; Withdrawn by applicant July 21, 1950.

10852 8-17-42 John Yelland; Chokecherry Spring; Irrigation; Denied July 21, 1950.

10953 4-28-43 Jake, Boyle, Ina Marie and Donnie Easley; Underground; Quasi-municipal; Denied May 24, 1951.

10977 8- 9-43 Benjamin Brodsky; Underground; Irrigation and domestic; Cancelled October 26, 1950, because of failure of applicant to comply with the provisions of permit.

10979 8-14-43 George S. Reed; Little Humboldt River; Power; Cancelled February 6, 1951, because of failure of applicant to comply with the provisions of permit.

10095 9- 7-43 Hi-T-Tungsten Co.; Summerfield Spring; Milling and domestic; Denied August 14, 1951.

11009 9-20-43 J. R. and D. B. Murphy, A. M. Phippen and R. L. Pollock; Monte Cristo Spring; Milling and domestic; Denied July 21, 1953.

11061 9-21-43 J. F. Cayton; Underground; Irrigation and domestic; Cancelled January 3, 1951, because of failure of applicant to comply with the provisions of permit.

11017 10- 1-43 Robert Landsborough; Underground; Irrigation and domestic; Denied August 14, 1951.

11084 3- 9-44 E. M. Booth; Underground; Mining and domestic; Cancelled February 29, 1952, because of failure of applicant to comply with the provisions of permit.

11088 3-17-44 R. J. Kelly and V. E. Greenwald; Lower Indian Spring; Stockwatering; Cancelled August 2, 1951, because of failure of applicant to comply with the provisions of permit.

11105 4-14-44 Frank Pastorino; Underground; Stockwatering and domestic; Approved June 28, 1951. G. S.

11106 4-15-44 Howard R. Clinger and E. Penn Smith; Mica Mountain Spring; Mining and domestic; Cancelled September 15, 1950, because of failure of applicant to comply with the provisions of permit.

11125 6-21-44 Simone Lompa; Waste Water; Irrigation and domestic; Cancelled October 9, 1950, because of failure of applicant to comply with the provisions of permit.

11136 6-27-44 Dept. of Highways; Callaway Spring; Domestic; Withdrawn by applicant March 18, 1952.

11141 6-23-44 Angelo C. Floris; Underground; Stockwatering; Denied April 10, 1951.

11188 10- 2-44 A. C. Floris; Underground; Stockwatering; Approved May 8, 1951. G. S.

11208 11-21-44 C. C. Marasco; Waste Water; Irrigation; Denied October 20, 1950.

11216 12-21-44 Marion K. Stewart; Bird Spring; Stockwatering and domestic; Denied August 14, 1951.

11236 1-25-45 J. H. Frasher; Underground; Mining and domestic; Withdrawn by applicant June 25, 1951.

11316 6-26-45 Otto Ziegs and Henry T. Giller; Carbonate Mill Site Spring; Mining, milling and domestic; Denied August 14, 1951.

11322 6-30-45 Victor V. and Marjorie H. Kunkel; Underground; Quasi-municipal and domestic; Withdrawn by applicant May 7, 1951.

11358 8-15-45 Arnold Zeuge; Underground; Quasi-municipal; Cancelled August 20, 1951, because of failure of applicant to comply with the provisions of permit.

11340 9- 4-45 Marguerite D. Quinby; Underground; Mining, milling and domestic; Cancelled June 20, 1951, because of failure of applicant to comply with the provisions of permit.

11377 10- 1-45 John H. Conaway; Joshua Spring; Stockwatering and domestic; Denied October 12, 1951.

11378 10- 1-45 John H. Conaway; Horn Spring; Stockwatering and domestic; Approved November 1, 1950. G. S.

11387 10-13-45 John H. Conaway; Mona Spring; Stockwatering and domestic; Approved November 1, 1950. G. S.

11448 12-17-45 Pete Etcheverry; Underground; Stockwatering; Approved April 23, 1951. G. S.

11449 12-17-45 Pete Etcheverry; Underground; Stockwatering; Approved April 23, 1951. G. S.

11443 12-21-45 Ross F. Steele; Troy Creek; Power and domestic; Cancelled June 20, 1951, because of failure of applicant to comply with the provisions of permit.

11452 1-10-46 Mark G. Bradshaw; Pogonip Spring; Mining and milling; Cancelled January 3, 1951, because of failure of applicant to comply with the provisions of permit.

11481 1-10-46 R. J. Kelly and V. E. Greenwald; Underground; Stockwatering; Cancelled August 2, 1951, because of failure of applicant to comply with the provisions of permit.

13370 5-10-50 Las Vegas Thoroughbred Racing Assn.; Underground; Domestic; Approved August 8, 1950. Abrogated by Permit 13475 to change.

13371 5-10-50 J. A. Balmans; Lake Tahoe; Domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

13372 5-10-50 C. R. Moorman and Milo W. Smith; Illipah Creek; Irrigation; Approved September 25, 1950. G. S.

13373 5-11-50 Frank A. and Anna Sagstetter and Mary A. Olson; Underground; Quasi-municipal and domestic; Approved August 28, 1950. G. S.

13374 5-12-50 Emma G. and H. E. Rogers; Underground; Stockwatering; Approved August 19, 1950. Certificate issued.

13375 5-15-50 Fallini Bros.; Reveille Mill Spring; Stockwatering; Approved November 1, 1950. Certificate issued.

13376 5-15-50 Fallini Bros.; Rose Spring; Approved November 1, 1950. Certificate issued.

13377 5-15-50 Fallini Bros.; Five Mile Spring; Approved November 1, 1950. Certificate issued.

13378 5-16-50 Charles J. Allen; Underground; Irrigation and domestic; Approved March 12, 1952. G. S.

13379 5-16-50 The Glenbrook Co.; Lake Tahoe; Domestic; Approved August 28, 1950. G. S.

13380 5-17-50 C. M. Trimble; Pollard Creek; Irrigation and domestic; Approved March 1, 1951. Certificate issued.

13381 5-23-50 Los Angeles Chemical Co.; Underground; Milling; Cancelled May 9, 1952, because of failure of applicant to comply with the provisions of permit.

13382 5-23-50 Los Angeles Chemical Co.; Underground; Milling; Cancelled May 9, 1952, because of failure of applicant to comply with the provisions of permit.

13384 5-24-50 Donald D. Graham; Underground; Irrigation and domestic; Withdrawn by applicant June 7, 1951.

13385 5-24-50 Mr. and Mrs. L. F. Cochran; Upper Pasture Springs; Irrigation and domestic; Withdrawn by applicant January 5, 1951.

13386 5-25-50 Bonanza Hotel; Underground; Quasi-municipal; Approved August 28, 1950. G. S.

13388 5-26-50 Frank M. Maloney; Clippenger Tunnel; Mining, milling and domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

13389 5-26-50 Frank M. Maloney; Upper Ford Spring; Mining, milling and domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

13390 5-26-50 Frank M. Maloney; Summit Spring; Mining, milling and domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

13391 5-26-50 Frank M. Maloney; Ford Spring; Mining, milling and domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

13392 5-29-50 Lawrence O'Toole; Washington Creek; Irrigation and domestic; Approved May 14, 1951. G. S.

13393 5-29-50 Wilbur Clark's Desert Inn; Underground; Quasi-municipal; Approved September 19, 1950. G. S.

13394 5-29-50 Wilbur Clark's Desert Inn; Underground; Quasi-municipal; Approved September 19, 1950. G. S.

13395 5-29-50 Ellison Ranching Co.; Underground; Irrigation and domestic; Approved December 6, 1950. G. S.

12397 5-31-50 Sunrise Hotel Corp.; Underground; Quasi-municipal; Approved September 19, 1950. G. S.

12398 5-31-50 Sunrise Hotel Corp.; Underground; Quasi-municipal; Approved September 19, 1950. G. S.

12399 5-31-50 Sunrise Hotel Corp.; Underground; Quasi-municipal; Approved September 19, 1950. G. S.

12400 6- 2-50 Henry McCleary Timber Co.; Cottonwood Creek and Tributaries; Irrigation and domestic; Denied January 23, 1951.

12402 6- 5-50 S. T. Clarke; Underground; Irrigation and domestic; Approved January 2, 1951. G. S.

12403 6- 5-50 S. T. Clarke; Underground; Irrigation and domestic; Approved January 2, 1951. G. S.

12405 6- 6-50 Monitor Livestock Co.; Willow Creek; Stockwatering; Approved January 12, 1951. G. S.

12406 6- 6-50 Monitor Livestock Co.; Butter Creek; Stockwatering; Approved January 12, 1951. G. S.

12408 6- 6-50 Nevada Gold Dome Mining Co.; Gilman Spring; Mining, milling and domestic; Approved March 14, 1951. G. S.

12410 6- 9-50 Peter Felis and Ed Parker; Natural (Chimney) Spring; Mining; Approved May 1, 1951. G. S.

12411 6- 9-50 A. H. Lage; Becky Springs; Domestic; Approved December 6, 1950. Certificate issued.

12412 6-12-50 Robert B. Griffith; Big Falls Spring; Irrigation and domestic; Approved February 1, 1951. G. S.

12413 6-12-50 Lynn and Anna L. Taylor; Underground; Irrigation and domestic; Approved April 3, 1951. G. S.

12414 6-12-50 James M. Daniels; Underground; Stockwatering; Approved October 22, 1950. Certificate issued.

12415 6-12-50 Frank W. and Lucille Welsh; Truckee River; Irrigation; Approved November 20, 1950. G. S.

12416 6-14-50 Silas Cordes; Blue Jacket Creek; Mining, milling and domestic; Cancelled January 18, 1951, because of failure to refile corrected application within statutory time.

12417 6-14-50 L. H. Linde; Lake Tahoe; Domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

12418 6-14-50 Ed, Jack and Robert E. Candee; Deadman Gulch; Fish and domestic; Cancelled June 11, 1951, because of failure to refile corrected application within statutory time.

12421 6-19-50 Garrett W. Beckley; Bilk Creek; Irrigation and domestic; Approved April 3, 1951. G. S.

12422 6-19-50 Garrett W. Beckley; Warm Springs; Irrigation and domestic; Approved April 23, 1951. G. S.

12423 6-19-50 Cannon Gardner; Gardner Spring; Stockwatering and domestic; Approved December 15, 1950. Certificate issued.

12424 6-19-50 Las Vegas Valley Water District; Lake Mead and the Colorado River; Municipal; Approved January 31, 1951. G. S.

12425 6-19-50 Irwin E. Smith; Underground; Irrigation and domestic; Approved September 17, 1951. G. S.

12426 6-26-50 C. B. Moorman, Milo Smith, Jess Gardner, W. C. Goodman, Walter and Joe Roesener, and Nevin Munson; Illipah Creek; Stockwatering; Approved April 3, 1951. Certificate issued.

12427 6-26-50 Dan Filippini; Underground; Irrigation; Approved April 13, 1951. G. S.

12428 6-26-50 Marvin A. Mosley; Spring; Irrigation; Approved December 13, 1950. G. S.

12429 6-26-50 Josie Cremetti, et al; East Walker River; Irrigation; Approved November 20, 1950. G. S.

12430 6-29-50 Reorganized Silver King Divide Mining Co.; Underground; Mining and domestic; Denied November 21, 1951.

12431 6-30-50 Bernard Klassen and Merle S. Peek; Underground; Irrigation and domestic; Approved December 11, 1950. G. S.

APPENDIX 5

Certificates Issued Under Permits, 1950–1952

Following is a condensed statement giving the salient data in connection with certificates issued under permits during the biennium for the period July 1, 1950, to June 30, 1952, in order of:

1. Certificate number.
2. Book number.
3. Permit number.
4. Name of appropriator.
5. Source of water supply.
6. Purpose of appropriation.
7. Amount of water in cubic feet per second, unless otherwise noted.
8. Date of certificate issued.

3471	11	12045	Steve Brown; Mason Springs; Stockwatering and domestic	0.0015	7-28-50
3472	11	11808	Charles and Elizabeth Hammond; Quail Seeps; Stockwatering and domestic	0.0011	7-28-50
3473	11	11277	W. E. and Ruth A. Saylor; Underground (Las Vegas Artesian Basin); Domestic	0.00446	7-28-50
3474	11	12841	Bunkerville Water Users Association; Seep Spring; Domestic	0.0247	7-28-50
3475	11	12842	Bunkerville Water Users Association; Dud's Spring; Domestic	0.10	7-28-50
3476	11	11621	C. J. and E. M. Lyons; Underground; Irrigation, domestic and fire protection	0.0047	7-28-50
3477	11	12969	Victor A. Johnson; Lake Tahoe; Domestic	0.0003	7-28-50
3478	11	11382	Alma Woods; Underground (Alma Woods' Well No. 1); Stockwatering	0.009	7-28-50
3479	11	12344	Lester M. Farias; Underground (Artesian Well); Stockwatering and domestic	0.02	7-28-50
3480	11	12371	Central Mercantile; Underground (Artesian Well); Domestic	0.0015	7-28-50
