Re: Notification of monitor well abandonment

Dear Sirs:

On May 11, 1989, monitor well [MW-1] (see map and notice of intent to drill) was abandoned by pumping five cubic yards of neat cement grout (consisting of 5.2 gallons of water per 94-pound bag of cement) through a tremie pipe. The well is owned by the Clark County Sanitation District. The grout was tremied from the bottom of the well to land surface. As the tremie pipe was being removed, a 60-foot section fell into the well; attempts to retrieve it were unsuccessful. After grouting the well, all surface expression (protective pad, protective casing) of the well was removed.

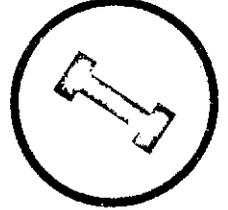

Sincerely,

*David Rock*
