5 WATER LEVEL
Static water level **flowing** feet below land surface
Artesian flow **yes** G.P.M. **1 gpm** P.S.I.
Water temperature _____ ° F Quality _____

6 Additional Notes or Comments

Measured well depth at 188'. Installed 2" pipe and blew debris from well to a depth of 190' when we started to get clay and sand. Hole would not stay open so decided that was bottom at installed 8" mills knife and installed it to 140' where it would not advance any further due to ledge in well. Perforated from 140' back to surface with 6 rows per foot. Installed 185' of tremme pipe and pumped in 5 yards of neat cement from bottom of well back to 50' where we ran out of cement. Let set overnight and sounded top of cement at 55' following morning. We then mixed 20 bags of cement with 100 gallons of water and pumped in through tremme pipe until well was topped off.
