8 WELL PLUGGING MATERIALS

6 Additional Notes or Comments
This is the well that was originally drilled as an exploration hole and then had 2 3/8" PVC installed in it and left open. The PVC did come out of the hole and had 20' of slotted screen on the bottom of it with a cap. Hole was cleaned to 460' with a 5 1/2" bit and the surface casing was left in the hole and a cement seal was present around it.
The hole number was STP 2007-1
