6. Additional Notes or Comments
We abandoned this well after efforts to recondition the well failed. The fill was left at 320'. We poured approximately 4 yards of 12 sack sand slurry from top to bottom per Hamilton Reed. We cut the casing off below grade.
The well log says there are perfs from 405-445'. However, there is no casing, therefore no perfs beyond the 260-280' level. It was open hole from 313'.
