6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thick-ness
Gravel		150'	240'	
Set up on hole pulled well collum and pump. Starte blowing gravel out of hole from 150'-240'. Blew gravel and big rocks out of hole for 4 days Gravel kept caving in around bit and plugging up.				
We were told to move rig off of hole so Barrick could put a bigger rig on hole to // pull casing and abandon hole properly.

Dear Sir:

The attached well log is for a replacement well that was drilled in the Barrick Goldstrike pit. The original well (PPW-3) was destroyed in the mining operation.

The remnants of that well was abandoned by another contractor, and your office should have the record of that operation.

-Log # 32933

If you should have any further questions please contact Barrick Goldstrike.

Sincerely,

Lang Exploratory Drilling,
a Division of Longyear Company

DOUGLAS SULLIVAN
