Re: Well Abandonments Ventosa & Cluro

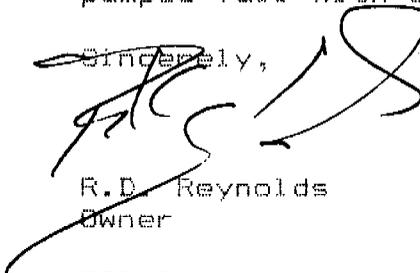

Dear Tom Gallagher:

Two wells were abandoned by Reynolds Drilling for the Union Pacific Railroad, locations, descriptions, and methods of abandonments are listed below.

#A Ventosa well site (NW1/4 Sec 1 T 34 R63E). Well was found to be 292 feet deep with static water level of 13 feet - ran 1 1/4 inch trammi pipe - pumped well full of bentonite - shot well with double 3 inch boosters on 10 feet intervals - pumped full with bentonite and cement.

#B Cluro well site (NE1/4 NW1/4 Sec 10 T 31 R50 E surveyed) Wells was found to be 83 feet with a static water level of 23 feet - ran trammi pipe - pumped in bentonite - shot well with dynamite - pumped full with bentonite and cement.

Sincerely,

R.D. Reynolds
Owner
